

ESRI Homeland Security GIS Summit

The Geographic Approach: A Framework for Mission-Critical Decision Making

July 11–14, 2009 | San Diego, California

Intelligence Fusion Center Panel

Moderator – Bryan Ware, CEO

Digital  Sandbox

Panel Members

- **Major Mike Ronczkowski – Miami-Dade Police Department**
- **Lt. Lori Norris – Arizona Counter Terrorism Information Center**
- **Director Maury Mitchell – Alabama Criminal Justice Information Center**
- **Ernie Chambers – DHS, State and Local Program Office**

High Level Questions for the Panel

- **What is the overall mission of your FC?**
- **What are some of the products you are producing in support of that mission?**
 - **What is the role of GIS in the production of those products and of Analytics in general? (emphasize more than printing of maps)**
- **What do you think are the “hard problems” fusion centers must tackle?**
 - **SARs? Knowing true CIKR? Data integration/sharing?**
 - **Answering the “what does it all mean” question?**
 - **Again, what is the role of GIS and of Analytics?**
- **What is the analytic and systems foundation that you have taken in your fusion center? In other words, what does your system look like, key components and technologies, users and roles?**
- **What are the missed opportunities? What are the really hard problems? What will we be talking about next year?**
- **What would you like to change in this overall system?**

Geographical Advantage in Data Fusion
