[**Şenyüz, Y., Dindar, K. & Altunsoy, F.** 2013. Contributions to the knowledge of Scarabaeidae (Coleoptera) fauna of the Middle and East Black Sea Region of Turkey. *Munis Entomology & Zoology*, 8 (2): 772-781]

**ABSTRACT:** Additional notes on 40 species belonging to Scarabaeidae from Middle and East Black Sea Region are given. New distributions are given for the taxa.

**KEY WORDS:** Scarabaeidae, Aphodiinae, Melolonthinae, Scarabaeinae, Dynastinae, new record.

The superfamily Scarabaeoidea comprises worldwide more than 35.000 species (Ratcliffe & Paulsen, 2008). Historically, the superfamily Scarabaeoidea was divided into two generalized groups based on the position of the abdominal spiracles; the Laparosticti and Pleurosticti. Laparostict scarabs, on the other hand, were characterized by having most of the abdominal spiracles located on the pleural membrane between the tergites and sternites and included taxa whose adults and larvae feed on dung, carrion, hides, and feathers (Ritcher, 1969; Arnett et al., 2002; Anlaş et al., 2011b). The family Scarabaeidae includes about 91% of all scarabaeoids and includes about 27,800 species worldwide. Within the Scarabaeidae, the Aphodiinae and Scarabaeinae include approximately 6,850 species worldwide (about 22% of scarabaeoids and 25% of Scarabaeidae) (Arnett et al., 2002). Nearly 700 species are reported from Turkey, 350 of them being Laparosticti (Carpaneto et al., 2000; Löbl & Smetana, 2006; Anlaş et al., 2011b).

After the researches and the publications of Rudolf Petrovitz along all the fifty, sixty and seventy years, it could be reasonable to suppose that the knowledge of the Coleoptera Scarabaeoidea of Turkey is near to be sufficiently thorough. Notwithstanding, the only downright summary on the Turkish fauna can be considered the paper by Carpaneto (1977), that mainly referenced to unpublished data of the same Petrovitz, and, to some extent, the checklist with no localities by Carpaneto et al. (2000) (Ziani & Sama, 2013).

The Scarabaeidae fauna of Middle and East Black Sea Region have been studied poorly. Some important studies on the Scarabaeidae of study area have been established by Lodos et al. (1999), Rozner & Rozner (2009).

The main aim of this study is to contribute to the knowledge of the Scarabaeidae Fauna of Middle and East Black Sea Region in Turkey.

### **MATERIAL AND METHODS**

The materials were collected from different localities of Middle and East Black Sea Region of Turkey. Forceps and sweeping nets were used to collect samples. The specimens were killed by using killing jar and pinned according to taxonomic

rules and regulations. The specimens are deposited in the first author's private collection of Biology department at Dumluypinar University.

Identification, classification and Distribution of Scarabaeidae suggested by Balthasar (1963, 1964), Dellacasa & Dellacasa (2006), Dellacasa & Kırız (2002), Kabakov (2006), Löbl & Smetana (2006), Lodos et al. (1978), Lodos et al. (1999), Rozner & Rozner (2009), Şenyüz & Şahin (2009), Şenyüz (2004), Tuatay et al. (1972) have been followed in this study.

## RESULTS

In this study totally 40 species belonging to Scarabaeidae were identified. And new distributions are given for the taxa. The taxa are presented alphabetically.

It is expected that the number of scarab species will increase significantly by the future investigations of Turkey Scarabaeidae fauna.

### FAMILY SCARABAEIDAE Latreille, 1802

#### SUBFAMILY Aphodiinae Leach, 1815

##### TRIBE Aphodiini Leach, 1815

##### GENUS *Aphodius* Illiger, 1798

##### SUBGENUS *Acanthobodilus* G. Dellacasa, 1983

##### SPECIES *Acanthobodilus immundus* (Creutzer, 1799)

**Material examined:** Ordu, Fatsa, Çömlaklı, 05.VII.2010, 10 exx.

**Records in Turkey:** Adana, Ankara, Antalya, Bartın, Bolu, Burdur, Çorlu, Gaziantep, İçel, Kahramanmaraş, Kastamonu, Kayseri, Kırşehir, Konya, Kütahya, Nevşehir, Osmaniye, Sakarya, Samsun, Zonguldak (Lodos et al., 1999; Rozner & Rozner, 2009; Şenyüz & Şahin, 2009a).

**Remark:** New to Ordu province.

##### SUBGENUS *Acrossus* Mulsant, 1842

##### SPECIES *Acrossus depresso* (Kugelann, 1792)

**Material examined:** Ordu, Kabataş, 06.VII.2010, 6 exx.; Artvin, Kılıçkaya, 2388 m, 11.VII.2010, 1 ♂.

**Records in Turkey:** Adana, Artvin, Çorum, İçel, Sakarya (Lodos et al., 1999; Rozner & Rozner, 2009).

**Remark:** New to Ordu province and thereby Middle Black Sea Region.

##### SPECIES *Acrossus luridus* (Fabricius, 1775)

**Material examined:** Ordu, Nadırılı, 05.VII.2010, 1 ♂; Rize, Tulumpınar, 1407 m, 12.VII.2010, 1 ♂; Artvin, Borçka, 587 m, 13.VII.2010, 1 ♂; Artvin, Yavuz village, 1789 m, 15.VII.2010, 2 ♂♂.

**Records in Turkey:** Adana, Adiyaman, Afyon, Ağrı, Ankara, Ankara, Antalya, Bartın, Bitlis, Bolu, Burdur, Çorlu, Çorum, Denizli, Diyarbakır, Erzurum, Eskisehir, Gaziantep, Gümüşhane, İçel, İzmir, Kahramanmaraş, Kars, Kütahya, Manisa, Osmaniye, Siirt, Sivas, Tarsus (Lodos et al., 1999; Şenyüz, 2004; Bellmann, 2007; Rozner & Rozner, 2009; Şenyüz & Şahin, 2009a; Anlaş et al., 2011b).

**Remark:** New to Artvin, Rize and Ordu provinces.

##### SUBGENUS *Amidorus* Mulsant & Rey, 1870

##### SPECIES *Amidorus cribriarius* (Brullé, 1836)

**Material examined:** Samsun, Akgöl, 16.VII.2010, 1 ex; Giresun, Kümbet Yaylası, 1784 m, 08.VII.2010, 4 exx.; Artvin, Kılıçkaya, 2388 m, 11.VII.2010, 1 ex.; Rize, Ovit mountain, 2292 m, 11.VII.2010, 14 exx.; Trabzon, Şekersu, 2237 m, 11.VII.2010, 12 exx.; Rize, Ovit Geçidi, 2561 m, 12.VII.2010, 15 exx.

**Records in Turkey:** Erzincan, Erzurum, Giresun, İçel, Sivas, Tarsus (Lodos et al., 1999; Rozner & Rozner, 2009).

**Remark:** New to Artvin, Giresun, Rize, Samsun and Trabzon provinces, and thereby Middle Black Sea Region.

#### SPECIES *Amidorus obscurus* (Fabricius, 1792)

**Material examined:** Samsun, Akgöl, 16.VII.2010, 1 ♂; Rize, Ovit mountain, 2292 m, 11.VII.2010, 5 exx.; Trabzon, Şekersu, 2237 m, 11.VII.2010, 4 exx.; Artvin, Yavuz village, 1789 m, 15.VII.2010, 1ex.

**Records in Turkey:** Adana, Artvin, Bartın, Erzincan, Erzurum, İçel, Kastamonu, Osmaniye, Rize (Lodos et al., 1999; Rozner & Rozner, 2009).

**Remark:** New to Samsun, Rize and Trabzon provinces and thereby Middle Black Sea Region.

#### SUBGENUS *Aphodius* Illiger, 1798

##### SPECIES *Aphodius sinetarius* (Linnaeus, 1758)

**Material examined:** Amasya, Ovasaray, 03.VII.2010, 1 ♂, 1 ♀; Ordu, Fatsa Çömlekli, 05.VII.2010, 1 ♀; Ordu, Kabataş, 06.VII.2010, 5 ♂♂, 4 ♀♀; Ordu, Gökköy, 07.VII.2010, 2 ♂♂, 3 ♀♀; Çorum, Çaybaşı, 16.VII.2010, 2 ♂♂; Giresun, Kümbet Yaylası, 1784 m, 08.VII.2010, 1 ♀; Artvin, Borçka, 587 m, 13.VII.2010, 1 ♂; Rize, Ayder Yaylası, 1670 m, 13.VII.2010, 3 ♂♂; Artvin, Yavuz village, 1789 m, 15.VII.2010, 1 ♂, 2 ♀♀.
