

**J. Ježek**

*An algorithm for free algebras*

Comment.Math.Univ.Carolin. 51,1 (2010) 9 –17.

**Abstract:** We present an algorithm for constructing the free algebra over a given finite partial algebra in the variety determined by a finite list of equations. The algorithm succeeds whenever the desired free algebra is finite.

**Keywords:** reflection, free algebra, variety, algorithm

**AMS Subject Classification:** 08B20, 08B05, 33-04
