

A Contribution to the Knowledge of Tenthredinidae (Symphyta, Hymenoptera) Fauna of Turkey

Part II: Subfamilies Blennocampinae, Dolerinae, Nematinae and Selandrinae*

Önder ÇALMAŞUR, Hikmet ÖZBEK

Atatürk University, Faculty of Agriculture, Department of Plant Protection, 25240 Erzurum – TURKEY

Received: 07.02.2003

Abstract: In the second part of this contribution to the fauna of the typical sawfly, Tenthredinidae in Turkey, the subfamilies Blennocampinae, Dolerinae, Nematinae and Selandrinae are discussed. Twenty-seven species in 13 genera of Blennocampinae, 7 species in 2 genera of Dolerinae, 9 species in 6 genera of Nematinae, and 4 species in 4 genera of Selandrinae, a total of 47 species, are recorded. Of these, 7 species were new to the Turkish fauna. New data on geographical distribution and host plants are given for some species. For each species, a chorotype is reported.

Key Words: Hymenoptera, Tenthredinidae, Blennocampinae, Dolerinae, Nematinae, Selandrinae, fauna, Turkey

Türkiye'nin Tenthredinidae (Symphyta, Hymenoptera) Faunasına Katkılar Bölüm II: Blennocampinae, Dolerinae, Nematinae ve Selandrinae Altfamilyaları

Özet: Tenthredinidae familyasının tespiti ile ilgili çalışmaların bu bölümünde; Blennocampinae, Dolerinae, Nematinae ve Selandrinae altfamilyaları incelenmiş; Blennocampinae'den 13 cinsde 27 tür, Dolerinae'den iki cins ve bunlara bağlı yedi tür, Nematinae'den altı cins ve bunlara bağlı dokuz tür, Selandrinae'den ise dört cinsde ait dört tür olmak üzere toplam 47 tür tespit edilmiştir. Bunlardan yedi tür Türkiye faunası için yeni kayıt durumundadır. Saptanan türlerin hemen tamamı için yeni yayılma alanları ve bazlarının konukları saptanmış, her türün bulunduğu chorotype belirlenmiştir.

Anahtar Sözcükler: Hymenoptera, Tenthredinidae, Blennocampinae, Dolerinae, Nematinae, Selandrinae, fauna, Turkey

Introduction

In the first contribution to the knowledge of Turkish typical sawflies, the Tenthredinidae subfamily Tenthredininae was dealt with (Çalmaşur and Özbek, in press). Here, the subfamilies Blennocampinae, Dolerinae, Nematinae and Selandrinae are discussed. Approximately 1400 typical sawfly samples were examined. Information related to materials and methods and other particulars was given in Part I.

Results

Subfamily Blennocampinae

The species belonging to this subfamily are medium-sized or small, and include the smallest representatives of

all sawflies. The body is usually robust, and black is the dominant colour. There are also entirely yellow or other colored species. The larvae live on or in various plants, though the members of some genera or tribes are attached to a specific group of plant species. Mostly they feed freely on the surface of the leaves, but a few make mines in the leaves or twigs of different arborescent plants. The representatives of Blennocampinae are spread over 5 continents. The known number of genera is around 150, of which 36 are found in Europe (Zombori, 1982).

Allantus Panzer, 1801

Synonym: *Anemphytus* Dovnar-Zapolskij, 1930;
Synemphytus Malaise, 1945; *Emphytus*, auct.

* This study is part of the requirements for the doctoral degree submitted to Ataturk University on 01.11.2002.

Allantus balteatus Klug, 1818

Synonym: *Tenthredo balteata* Klug, 1818; *Emphytus bucculentus* Tischbein, 1846; *E. fulvocinctus* Rudow, 1872.

Material Examined: Bayburt: Kopdağı, 2100-2300 m, 21.VI.2001, 1♀, Maden, 1700 m, 16.VI.2000, 1♀, 21.VI.2001, 1♀. Erzurum: İlica, Atlıkonak, 2400 m, 29.VI.2001, 3♀♀; Köprüköy, Örentaş, 2100 m, 12.VI.2001, 1♀; Oltu, Sütkans, 1500 m, 25.VI.1996, 1♀, Tutmaç, 2000 m, 1.VII.2000, 3♀♀; Pasinler, Çalıyazı, 2400 m, 10.VII.1997, 1♀; Şenkaya, Turnalı, 1700 m, 1.VII.1990, 1♀; Tortum, Kireçlıdağı, 2200 m, 2.VII.2000, 1♂. Gümüşhane: Vauk Geçidi, 1850 m, 21.VI.2001, 1♀, 24.VI.2001, 1♀.

Distribution in Turkey: Afyon (Chevin and Chenon, 1982).

General Distribution: Europe, Cyprus, Turkey, Caucasus, Siberia, Central Asia, Iran (Chevin and Chenon, 1982; Lacourt, 1999); Sibero-European.

Host Plant: The larvae were collected from *Rosa canina*. Lacourt (1999) gave various *Rosa* species as the host plant.

Allantus basalis (Klug, 1818)

Synonym: *Emphytus togatus* Stephens, 1835, nec Panzer, 1801; *E. basalis caledonicus* Benson, 1945.

Material Examined: Erzincan: Bahçeli, 1350 m, 26.V.2001, 1♀. Erzurum: Dutçu, 2200 m, 18.VII.1999, 2♂♂; Köprüköy, Örentaş, 1900-2100 m, 12.VI.2001, 2♀♀.

Distribution in Turkey: Bursa and Samsun (Benson, 1968).

General Distribution: Europe, Turkey, Siberia, Mongolia, China, Japan, Korea, North America (Benson, 1968; Liston, 1995; Lacourt, 1999).

Host Plant: *Rosa majalis*, *Rosa cinnamomea*, *Betula* spp., *Dasiphora fruticosa* (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Allantus cinctus (Linne, 1758)

Synonym: *Tenthredo cordigera* Geoffroy, 1785; *T. togata* Zetterstedt, 1840, *Dolerus varipes* Audinet-Serville, 1823; *Emphytus neglectus* Zaddach, 1859.

Material Examined: Artvin: Borçka, Karagöl, 1650 m, 8.VII.1994, 1♂, 1♀. Erzurum: University field, 1850 m, 19.VI.1998, 1♂, 24.VI.1999, 1♂.

Distribution in Turkey: Amasya and Gümüşhane (Benson, 1968).

General Distribution: Turkey, Caucasus, Transcaucasia, Siberia, North America, Iran, Crimea, Kazakhstan, Mongolia, Europe, Central Asia (Benson, 1968; Cingovski, 1982; Medvedev, 1994; Liston, 1995; Lacourt, 1999; Magis, 2002); Holarctic.

Host Plant: Adults were collected from *Rosa* sp. *Rosa pimpinellifolia*, *Rubus* spp. and *Fragaria* spp. were listed as the host plant of larvae by Liston (1995), Taeger and Blank (1998) and Lacourt (1999).

Allantus cingulatus (Scopoli, 1763)

Synonym: *Tenthredo togata* Fabricius, 1804, nec Panzer, 1801; *T. tenuis* Audinet-Serville, 1823; *Emphytus elagans* Costa, 1859.

Material Examined: Erzincan: Dumanlı, 1200 m, 25.V.2001, 1♂. Erzurum: Şenkaya, Ormanlı, 1800 m, 20.V.1994, 1♂. Gümüşhane: Vauk Geçidi, 1850 m, 21.VI.2001, 1♂.

Distribution in Turkey: Medvedev (1994) pointed out that this species occurred in Turkey, but supplied no location.

General Distribution: Europe, Caucasus, Turkey, Transcaucasia, Siberia (Benson, 1968; Medvedev, 1994; Lacourt, 1999; Magis, 2002); Sibero-European.

Host Plant: *Rosa* spp., *Corylus* spp., *Betula* spp., *Fragaria* spp. (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Allantus didymus (Klug, 1818)

Synonym: *Dolerus testaceipes* Audinet-Serville, 1823; *Emphytus nigritarsis* Brullé, 1832; *E. proximus* Costa, 1859; *E. ruficrus* Mocsary, 1880; *E. fumatus* André, 1880.

Material Examined: Artvin: Yusufeli, Altıparmak, 1100 m, 5.VII.1997, 1♂. Bayburt: Kopdağı, 2100-2300 m, 16.VI.2000, 3♂♂. Erzincan: Merkez, 1300 m, 18.VII.1997, 1♀; Bahçeli, 1200 m, 26.V.2001, 1♂, 1♀; Dumanlı, 1200 m, 25.V.2001, 2♀♀; Gülkaymak, 1200 m, 25.V.2001, 1♂, 1♀; Üzungöl, 1200 m, 25.V.2001, 1♀. Erzurum: Yeşildere, 2000 m, 18.VI.1982, 2♀♀; Hinis, 1800 m, 14.VI.2002, 1♂; İlica, Atlıkonak, 2000-2400 m, 11.VI.2000, 3♀♀, 13.VI.2002, 1♀, 29.VI.2001, 3♂♂; Eğerti, 1900 m, 16.VI.2002, 1♀; İspir, Madenköprübaşı, 1400 m, 18.VI.1994, 1♀; Oltu, Başaklı,

1850 m, 22.VIII.2001, 1♂, Çamlıbel, 1750 m, 2.VII.1997, 1♀, Tutmaç-Başaklı, 2000 m, 1.VII.2000, 2♂; Pasinler, Çalıyazı, 2400 m, 10.VII.1997, 1♂; Şenkaya, Turnalı, 1750 m, 12.VI.1992, 1♀. Gümüşhane: Vauk Geçidi, 1850 m, 21.VI.2001, 1♂, 24.VI.2001, 3♀. Kars: Sarıkamış, Karaúrgan, 2000 m, 24.VI.1999, 1♂.

Distribution in Turkey: Adana, Amasya, Ankara, Bolu, Erzurum, Gümüşhane, Mersin, Niğde and Tokat (Benson, 1968; Wolf, 1968; Chevin and Chenon, 1982).

General Distribution: Europe, Mediterranean Region, Turkey, Iran, Caucasus, Kazakhstan, Russia, Central Asia (Benson, 1968; Cingovski, 1982; Medvedev, 1994; Liston, 1995; Lacourt, 1999; Magis, 2002); Siberio-European.

Host Plant: *Sanguisorba minor*, *Rosa* spp., *Rubus* spp. (Lacourt, 1999).

Allantus togatus (Panzer, 1801)

Synonym: *Tenthredo succincta* Klug, 1817; *Emphytus succinctus* var. *steini* Schmiedeknecht, 1881; *E. togatus* var. *succinctus*, auct.

Material Examined: Erzurum: Çat, 2000 m, 11.VII.2002, 1♀.

Distribution in Turkey: Erzurum (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Siberia, Japan (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Palaearctic.

Host Plant: Adult was collected on *Salix* sp. Liston (1995), and Taeger and Blank (1998) gave the host plant of this species as *Salix* spp., *Betula* spp. and *Quercus* spp.

Allantus viennensis (Schrank, 1781)

Synonym: *A. viennensis* var. *uberior* Enslin, 1914; *Emphytus viennensis* var. *nigricoxis* De Stefani, 1883; *E. viennensis* var. *medinae* Konow, 1894.

Material Examined: Erzincan: Avcılar, 1300 m, 26.V.2001, 1♀. Erzurum: Dutçu, 2200 m, 18.VII.1999, 1♂, 1♀; İspir, Çayırozü, 4.VII.1997, 1♀. Gümüşhane: Vauk Geçidi, 1850 m, 21.VI.2001, 1♀. Kars: Sarıkamış, Karakurt, 1500m, 23.VI.2000, 2♀.

Distribution in Turkey: New record for Turkish fauna.

General Distribution: Europe, Transcaucasia, Caucasus, Central Asia, Siberia, North America (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999; Magis, 2002); Holarctic.

Host Plant: Larvae were collected from *Rosa* sp. Liston (1995), Taeger and Blank (1998) and Lacourt (1999) listed various *Rosa* spp. as the host plant of *A. viennensis*.

Ametastegia Costa, 1882

Synonym: *Aomodyctium* Ashmead, 1898; *Protemphytus* Rohwer, 1909; *Emphytina* Rohwer, 1911; *Simplemphytus* MacGillivray, 1914; *Unitaxonus* MacGillivray, 1921; *Taxonus* auct; *Allantus* auct; *Emphytus*, auct.

Ametastegia glabrata (Fallen, 1808)

Synonym: *A. fulvipes* Costa, 1882; *Tenthredo agilis* Klug, 1817; *T. rufipes* Audinet-Serville, 1823, *Taxonus nigrisoma* Norton, 1862; *Strongylogaster abnormis* Provancher, 1885; *Strongylogastroidea potulenta* MacGillivray, 1923.

Material Examined: Erzurum: Pasinler, Rabat, 2400 m, 11.VII.1996, 1♂; Tortum, Esendurak, 1600m, 11.IX.2001, 1♂.

Distribution in Turkey: Mersin (Chevin and Chenon, 1982).

General Distribution: Europe, Mediterranean Region, Russia, Crimea, Caucasus, Kazakhstan, Central Asia, Pacific Coastal Region, North Africa, Mongolia, Siberia, North America (Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Rumex acetosella*, *R. crispus*, *R. longifolius*, *Chenopodium* spp., *Lythrum salicaria*, *Plantago* spp., *Rheum rhabarbarum*, *Solanum dulcamara*, *S. tuberosum*, *Epilobium* spp., *Fagopyrum* spp., *Vicia* spp., *Polygonum aviculare* (Liston, 1995).

Ametastegia pallipes (Spinola, 1808)

Synonym: *Tenthredo grossulariae* Klug, 1818; *T. lapponica* Zetterstedt, 1838; *T. pallipes* Provancher, 1878, nec Spinola, 1808; *Dolerus leucopodus* Audinet-Serville, 1823; *Emphytus canadense* Kirby, 1882; *E. pallidipes* Dalla Torre, 1894; *Empria cavata* MacGillivray, 1911; *E. cetaria* MacGillivray, 1921.

Material Examined: Artvin: Orcuk, 400 m, 21.V.1997, 1♀.

Distribution in Turkey: Lacourt (1999) indicated that this species was present in Turkey, but supplied no location.

General Distribution: Europe, Turkey, Caucasus, Iran, Siberia, North America (Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Viola* spp. (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

***Apethymus* Benson, 1939**

Synonym: *Kjellia* Malaise, 1947

***Apethymus apicalis* (Klug, 1818)**

Synonym: *A. serotinus* Müller, 1776; *Emphytus filiformis* Klug, 1818.

Material Examined: **Kars**: Sarıkamış, 1900 m, 9.X.1998, 1♀. The adult was collected from under a stone.

Distribution in Turkey: New record for Turkish fauna.

General Distribution: Europe, Russia (Liston, 1995); West Palaearctic.

Host Plant: *Rosa multiflora*, *R. rubiginosa*, *R. rugosa* (Liston, 1995; Lacourt, 1999).

***Athalia* Leach, 1817**

Synonym: *Dentathalia* Benson, 1931

***Athalia bicolor* Serville, 1823**

Synonym: *Tenthredo annulata* Fabricius, 1787; *T. rosae* Linne, 1758.

Material Examined: Artvin: Şavşat, Bahçeli, 500 m, 22.V.1997, 1♂. Bayburt: 25 km S, 1750 m, 21.VI.2001, 1♂; Kopdağı, 2300 m, 16.VI.2000, 5♂♂; Maden, 1650 m, 16.VI.2000, 1♂. Bingöl: Çıraklı Geçidi, 2000 m, 3.VI.2001, 2♂♂, 11.VI.2002, 1♀. Erzincan: Bahçeli, 1300 m, 26.V.2001, 2♂♂; Üzümlü, 1200 m, 25.V.2001, 1♂. Erzurum: University field, 1850 m, 21.VI.2000, 1♂, Karagöbek, 1900 m, 28.VI.2000, 4♂♂; Aşkale, 1800 m, 23.V.2000, 1♂, 20♀; Hınıs, 1800 m, 14.VI.2002, 1♀; Horasan, Aras Vadisi, 1700 m, 23.V.2001, 1♂; İlica, Atlıkonak, 2000 m, 11.VI.2000, 9♂♂, 1♀, 13.VI.2002, 2♂♂, Sorkunlu, 1900 m, 28.V.2000, 20♀; Köprüköy, Örentaş, 2100 m, 12.VI.2001, 3♂♂, 20♀; Oltu, 1400 m, 19.V.1999, 8♂♂, 1♀, Sarısaç, 1400 m, 16.V.1997, 1♂, 17.V.2000, 8♂♂, 6♀♀, 14.VI.2000, 1♂, 1♀, 21.VI.2000, 1♂; Şenkaya, Soğanlıdağı, 2250 m, 24.VI.1999, 1♂, 1♀; Uzungere, Gölbaşı, 1100m, 13.V.2000, 1♀. Gümüşhane: Vauk Geçidi, 1850 m, 21.VI.2001, 1♂. Kars: Sarıkamış, Karakurt, 1550 m, 23.V.2001, 1♂, 2.VI.1999, 8♂♂, 4.VI.2000, 20♀, 4.VII.2000, 20♀. Rize: Çamlıhemşin, Ayder, 1200-1550 m, 30.VII.2000, 2♂♂, 5♀♀; İkizdere, Çamlık, 1600 m, 29.VII.2000, 1♀, Ovit, 1600-2400 m, 29.VII.2000, 1♂, 1♀.

Distribution in Turkey: Artvin, Bursa, Bilecik, Edirne, Erzurum, Samsun, Trabzon and Uşak (Benson, 1968; Chevin and Chenon, 1982).

General Distribution: Europe, Mediterranean Region, Crimea, Turkey, Transcaucasia, Caucasus, Russia, North Africa, Central Asia (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Palaearctic.

Host Plant: Adults were collected in pastures. *Ranunculus* spp. were given as the host plant of this species by Taeger and Blank (1998) and Lacourt (1999).

***Athalia circularis* (Klug, 1815)**

Synonym: *A. lineolata* Audinet-Serville, 1823; *A. bolivari* Dusmet, 1896; *A. lineolata libertoides* Priesner, 1928; *A. longifoliae* Kontuniemi, 1951; *A. alpina* Chevin, 1969; *Tenthredo rosae*, auct., nec Linne, 1758.

Material Examined: Artvin: Ardanuç, Ferhatlı, 13.V.2000, 1♀; Şavşat, Bahçeli, 22.V.1997, 1♀, Karagöl, 1650 m, 8.VII.1998, 2♂♂, 12♀♀. Bayburt: Çalidere, 1850 m, 16.VI.2000, 1♂; Maden, 1650 m, 16.VI.2000, 2♂♂, 1♀, 1700 m, 21.VI.2001, 1♀, Yoncalık Yaylası, 2700 m, 5.VII.2000, 1♂, 1♀; Kopdağı, 2100 m, 16.VI.2000, 2♂♂. Erzincan: Avcılar, 1300 m, 26.V.2001, 1♀; Çağlayan, 1400 m, 22.V.1982, 1♂. Erzurum: It is common and abundant in Erzurum province. The materials were collected from the middle of May to the middle of August from Göngörmez, Karagöbek, Köşk, University field, Yeşilyayla, Aşkale (Kopdağı) Çat (Çimiş), Horasan, İlica (Atlıkonak, Rizekent, Sorkunlu), İspir (Madenköprübaşı), Köprüköy (Örentaş), Olur (Süngübahir), Oltu (Başaklı, Çamlıbel, Sarısaç), Pasınler (Rabat), Pazaryolu (Karataş), Şenkaya (Ormanlı, Turnalı) and Tortum (Aşağısivri, Bağbaşı, Esendurak) at altitudes of 1300-2700 m, 37♂♂, 38♀♀. Gümüşhane: Vauk Geçidi, 1850 m, 21.VI.2001, 1♀. Kars: Sarıkamış, 1900 m, 27.V.2000, 1♂, Karaurgan, 2000 m, 24.VI.1999, 1♀, Karakurt, 1550 m, 2.VI.1999, 1♀, Şeytangeçmez, 1500 m, 2.VI.1999, 1♂, TCK Çeşmesi, 1500-1700 m, 23.V.2001, 1♀, 2.VI.1999, 1♂, 4.VI.2000, 20♀, 4.VII.2000, 20♀. Rize: Çamlıhemşin, Ayder, 1200-1550 m, 30.VII.2000, 2♂♂, 5♀♀; İkizdere, Çamlık, 1600 m, 29.VII.2000, 1♀, Ovit, 1600-2400 m, 29.VII.2000, 1♂, 1♀.

Distribution in Turkey: Amasya, Artvin, Bolu, Çorum, İstanbul, Mersin, Muğla, Rize, Samsun, Tokat, Trabzon, and Zonguldak (Benson, 1968).

General Distribution: Europe, Mediterranean Region, Turkey, Crimea, Caucasus, Transcaucasia, Central Asia, North America, Mongolia, Himalayas, China, Japan, Russia (Benson, 1968; Cingovski, 1982; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: The larvae were observed feeding on the leaves of *Arctium lappa*. The following plant species were given as host plants of *A. circularis*: *A. lappa*, *Ajuga reptans*, *Veronica beccabunga*, *Plantago* spp., *Alliaria petiolata*, *Melampyrum* spp., *Capsella* spp., *Lycopus* spp., *Veronica longifolia*, *Veronica officinalis*, *Glechoma hederacea* (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Athalia cordata Serville, 1823

Synonym: *A. suessionnensis* Audinet-Serville, 1823; *A. blanchardi* Brullé in Lepeletier, 1846; *Tenthredo rosae*, auct., nec Linne, 1758.

Material Examined: Artvin: Şavşat, Bahçeli, 500 m, 22.V.1997, 1♀. Bingöl: Çırışligeçidi, 2000 m, 3.VI.2001, 1♀. Erzurum: İlica, Atlıkonak, 2000 m, 11.VI.2000, 2♀; İspir, İspirgeçidi, 2100 m, 13.VII.2001, 1♀; Köprüköy, Örentaş, 1900-2100 m, 12.VI.2001, 1♀; Oltu, Kaleboğazı, 1450 m, 18.IV.2001, 1♀, 1350 m, 25.IV.2000, 2♀, Subatık, 1300 m, 20.V.2001, 1♀, Tavşantepe, 1400 m, 11.IV.2001, 2♀. Kars: Karakurt, Aras Vadisi, TCK Çeşmesi, 1500-1600 m, 23.V.2001, 4♀.

Distribution in Turkey: Aydın, Bolu, Bursa, Giresun, Kars, Kütahya, Muğla, Rize, Samsun and Trabzon (Benson, 1968); Mersin (Chevin and Chenon, 1982).

General Distribution: Europe, Mediterranean Region, Turkey, Crimea, Caucasus, Russia, Crete, Cyprus, Russia, Belarus, Ukraine, Moldova, Georgia, Armenia, Azerbaijan, North Africa, Canary Islands, Israel (Benson, 1968; Cingovski, 1982; Liston, 1995; Zhelochovtsev and Zinovjev, 1996; Lacourt, 1999); Palaearctic.

Host Plant: *Misopates orontinum*, *Antirrhinum majus*, *Ajuga reptans*, *Teucrium scorodonia*, *Plantago* spp. (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Athalia liberta (Klug, 1815)

Synonym: *A. rosae* var. *immaculata* Konow, 1884; *Tenthredo rosae*, auct., nec Linne, 1778, *T. rosae* var. *liberta* Klug, 1815.

Material Examined: Artvin: Hopa, 2.IX.1994, 1♂; Oruçlu, 21.V.1997, 1♀; Şavşat, Bahçeli, 500 m,

22.V.1997, 2♂, 1♀, Karagöl, 1650 m, 8.VII.1998, 2♂, 3♀. Erzincan: Bahçeli, 1200 m, 26.V.2001, 1♀; Cevizli, 1300 m, 4.VI.1990, 1♀; Dumanlı, 1200 m, 25.V.2001, 1♂; Üzümlü, 1200 m, 25.V.2001, 1♂. Erzurum: It is common and abundant in Erzurum province. The materials were collected from the end of May to the end of August from Dutçu, Gökçeyamaç, University field, Yeşildere, Aşkale (Aşağıkop), İlica (Atlıkonak), Oltu (Başaklı, Çamlıbel, Sarısaç, Tutmaç), Pasinler, Şenkaya (Turnalı), Tortum (Aşağısivri, Katıkları, Söğütpetrol, Yukarımeydanlar) at altitudes of 1300-2200 m, 30♂, 28♀. İğdır: 850 m, 17.V.1991, 1♀, 25.V.1971, 1♂, 2♀, 17.VII.1997, 1♀; Çalpala, 15.VI.2001, 5♂, 1♀. Kars: Sarıkamış, Karakurt, Aras Vadisi, 1450 m, 23.VI.2000, 1♂, 9.VII.2000, 1♂, 3.VIII.2001, 2♂, Kars-Erzurum border, 1650 m, 2.VI.1999, 1♂, TCK Çeşmesi, 1600-1700 m, 23.V.2001, 4♂, 7♀, 4.VI.2000, 4♂, 1♀, Şeytangeçmez, 1500 m, 2.VI.1999, 1♂; Karaürgan, 2000 m, 24.VI.1999, 1♂. Rize: Çamlıhemşin, Ayder, 1200-1550 m, 30.VII.2000, 1♂, 1♀; İkizdere, Ovit, 2300 m, 29.VII.2000, 1♀.

Distribution in Turkey: Amasya, Aydın, Burdur, Erzurum, Gümüşhane, İstanbul, Samsun and Trabzon (Benson, 1968; Chevin and Chenon, 1982).

General Distribution: Europe, Mediterranean Region, Turkey, Russia, Iran, Asia, Uzbekistan, Kyrgyzstan, Caucasus, Transcaucasia, Siberia, Pacific Coastal Region, Himalayas, China, Japan (Benson, 1968; Cingovski, 1982; Medvedev, 1994; Liston, 1995; Zhelochovtsev and Zinovjev, 1996; Lacourt, 1999); Palaearctic.

Host Plant: *Alliaria petiolata*, *Arabidopsis thaliana*, *Cardamine hirsuta*, *Sisymbrium officinale* (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Athalia maculata Mocsary, 1879

Material Examined: Bayburt: Kopdağı, 2100 m, 16.VI.2000, 2♂, 4♀, 2100-2300 m, 21.VI.2001, 1♂, 1♀. Erzurum: Palandöken, 2100 m, 8.VII.2001, 1♂; Aşkale, 1800 m, 23.V.2000, 1♀; Hinis, 1800 m, 14.VI.2002, 1♂, 3♀; İlica, Ağızıaçık Bakımevi, 2300 m, 16.VI.2002, 1♂, Atlıkonak, 2000 m, 23.VI.2002, 2♂; Köprüköy, Örentaş, 1900-2100 m, 12.VI.2001, 1♂; Oltu, Sarısaç, 1400 m, 14.VI.2000, 1♀, Tutmaç-Başaklı, 1700-2000 m, 1.VII.2000, 2♀; Şenkaya, Ormanlı, 1800 m, 20.V.1994, 2♂; Tortum, Kireçlidağı, 2200 m, 2.VII.2000, 1♂, 2♀. Gümüşhane: Vauk Geçidi, 1850 m, 21.VI.2001, 1♂. Kars: Sarıkamış, Karakurt, Aras Vadisi, 1500 m, 23.VI.2000, 1♀.

Distribution in Turkey: Amasya, Bolu and Samsun (Benson, 1968).

General Distribution: Europe, Turkey, Transcaucasia, Caucasus, Hungary (Benson, 1968; Cingovski, 1980; Medvedev, 1994); West Palaearctic.

Host Plant: Unknown.

***Athalia rosae* (Linne, 1758)**

Synonym: *Tenthredo spinarum* F., 1775; *T. salicis* Schrank, 1781, nec Linne, 1758; *T. colibri* Christ, 1791; *T. centifoliae* Panzer, 1798.

Material Examined: Ağrı: 16.VI.2001, 1♀; Doğubayazıt, 16.VI.2001, 2♂, 3♀. Ankara: Ş.Koçhisar, 9.VII.1998, 1♂. Muğla: 14.VIII.1983, 1♂, 3♀. Rize: Çamlıhemşin, Ayder, 1200-1550 m, 30.VII.2000, 1♀; Pazar, 200 m, 25.VII.1998, 1♂. Trabzon: 26.VII.1996, 1♂.

Distribution in Turkey: Adana, Antalya, Gümüşhane, Isparta, İstanbul, Kars, Kütahya, Mersin, Rize, Samsun,

Trabzon and Uşak (Benson, 1968; Chevin and Chenon, 1982).

General Distribution: Europe, Mediterranean Region, Turkey, Israel, Iran, Russia, Siberia, China (Benson, 1968; Cingovski, 1982; Lacourt, 1999); Palaearctic.

Host Plant: Larvae collected on radish, *Raphanus sativus*, turnip, *Brassica rapa*, *Sinapis arvensis* and *Sisymbrium officinale*. *A. rosae* is known to be an important pest of radish and turnip in Turkey (Özbek, 1989). Özbek observed that during 1974-1976, a mass outbreak of this species occurred in the research field of Atatürk University and some villages on the Erzurum plateau. Liston (1995), Taeger and Blank (1998) and Lacourt (1999) gave *Armoracia rusticana*, *Barbarea*, *Brassica napus*, *B. juncea*, *B. rapa*, *B. oleracea*, *Sisymbrium officinale*, *Tropaeolum majus*, *Raphanus raphanistrum*, *Sinapis arvensis*, *Alliara petiolata* and *Cardamine* spp. as the host plants of *A. rosae*.

***Athalia rufoscutellata* Mocsary, 1879**

Synonym: *Athalia martima* Kirby, 1884; *A. rufoscutellata* var. *nigroscutellata* Konow, 1891; *A. r. var. mocsaryi* Konow, 1891; *A. r. var. pleuralis* Konow, 1898; *A. r. var. obscurata* Konow, 1904.

Material Examined: Bingöl: Solhan, 2100 m, 25.VI.2000, 1♀. Erzurum: 1850 m, 31.V.1985, 1♀, 01.VI.1983, 2♀, University field, 1850 m, 30.V.2002, 1♀; Aşkale, 1800 m, 23.V.2000, 1♀; Hınıs, 1800 m, 14.VI.2002, 1♂, 3♀; Horasan, Aktaş, 1700 m, 11.VI.2002, 1♀; İlica, Atlıkonak, 2000 m, 11.VI.2000, 4♀; Köprüköy, Örentaş, 1900-2100 m, 12.VI.2001, 3♀; Narman, Savaşçılar, 2300 m, 13.VI.1999, 1♀; Oltu, Sarısaç, 1450 m, 16.V.1997, 2♀; Pasinler, Pelitli, 2000 m, 14.VII.1998, 1♀; Uzundere, Gölbaşı, 1100 m, 13.V.2000, 1♀. Kars: Sarıkamış, Karakurt, 1650 m, 2.VI.1999, 1♀, TCK Çeşmesi, 1600 m, 23.V.2001, 2♀; Akkurt, Aras Vadisi, 1600m, 23.VI.2000, 1♀.

Distribution in Turkey: Ankara, Artvin, Bolu, Bursa, Çorum, Gümüşhane and Samsun (Benson, 1968; Wolf, 1968).

General Distribution: Europe, Turkey, Transcaucasia, Crimea, Caucasus, Russia (Benson, 1968; Cingovski, 1982; Medvedev, 1994; Lacourt, 1999); Asiatic-European.

Host Plant: *Teucrium* spp. (Lacourt 1999).

Caliroa O. Costa, 1859

Synonym: *Eriocampoides* Konow, 1890;
Periclistoptera Ashmead, 1898

Caliroa cerasi (Linne, 1758)

Synonym: *C. laudata* MacGillivray, 1909; *C. lacinata* MacGillivray, 1909; *Tenthredo limacina* Retzius, 1783; *T. adumbrata* Klug, 1816; *Monostegia antipoda* Kirby, 1881; *Tenthredo aethiops* auct., nec Fabricius, 1781.

Material Examined: Erzurum: Oltu, Başaklı, 1850 m, 15.VIII.1991, 6♀, Çamlıbel, 1750 m, 2.VII.1999, 1♀.

Distribution in Turkey: Marmara Region and Samsun (Benson, 1968; Birkardeşler, 1971).

General Distribution: Europe, Turkey, Caucasus, Russia, Africa, North America, Australia, New Zealand (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: The larva of *C. cerasi* is a distructive pest on the leaves of the sour cherry, *Prunus cerasus* and the sweet cherry, *P. avium*, and occurs sporadicall in the country (Özbek et al., 1995). In this study, larvae were collected from Oltu, Tortum, Uzundere and on the campus of Atatürk University from the sour cherry and the sweet cherry. It was very abundant on the campus in 2002. Other host plants indicated in the literature are: *Cotoneaster* sp., *Malus* spp., *Betula* spp., *Mespilus germanica*, *Quercus* spp., *Rosa* spp., *Rubus* spp., *Salix* spp., *Amelanchier lamarckii*, *Crataegus monogyna*, *Cydonia oblonga*, *Prunus domestica*, *P. padus*, *P. spinosa*, *Pyrus communis*, *Sorbus aucuparia*, *Padus* spp., *Persica vulgaris* (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Eriocampa Hartig, 1837

Synonym: *Brachycampa* Zirngiebl, 1956

Eriocampa ovata (Linne, 1761)

Synonym: *Tenthredo gossypina* Retzius, 1783; *T. vernalis* Geoffroy, 1785; *T. leucogona* Schrank, 1802; *Eriocampa ovata nitens* Benson, 1968.

Material Examined: Artvin: Şavşat, Karagöl, 1650 m, 8.VII.1998, 1♀. Rize: Çamlıhemşin, Ayder, 1200-1550 m, 30.VII.2000, 2♀. Trabzon: Sümelamanastırı, 25 km N, 2.VII.2002, 1♀.

Distribution in Turkey: Edirne, İstanbul, Kırklareli, Rize, Tokat and Trabzon (Benson, 1968; Çanakçıoğlu and Mol, 1998).

General Distribution: Europe, Turkey, Caucasus, Transcaucasia, Russia, North America (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Alnus glutinosa*, *A. incana*, *Rhamnus* spp., *Frangula alnus*, *Salix caprea* (Liston, 1995; Taeger and Blank, 1998; Çanakçıoğlu and Mol, 1998).

Eriocampa umbratica (Klug, 1816)

Synonym: *Phyllotoma nigrita* Fallen, 1829

Material Examined: Artvin: Borçka, Karagöl, 1650 m, 8.VII.1994, 1♀; Şavşat, Karagöl, 1650 m, 8.VII.1998, 12♂♂, 5♀.

Distribution in Turkey: Artvin, Rize and Trabzon (Benson, 1968).

General Distribution: Europe, Turkey, Caucasus, Russia (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); West Palaearctic.

Host Plant: *Alnus glutinosa*, *A. incana* (Liston, 1995; Lacourt, 1999).

Eutomostethus Enslin, 1913

Synonym: *Atomostethus* Ens., 1913; *Tomostethopsis* Sato, 1928; *Forsia* Malaise, 1932.

Eutomostethus ephippium (Panzer, 1798)

Synonym: *Tenthredo dubia* Gmelin, 1790, nec Ström, 1768; *T. ovata* Schrank, 1781, nec Linne, 1761; *T. inhabilis* Harris, 1835.

Material Examined: Trabzon: Sumelamanastırı, 1100 m, 2.VII.1996, 1♀.

Distribution in Turkey: New record for Turkish fauna.

General Distribution: Europe, Russia, Caucasus, Pacific Coastal Region, Central Asia, Himalayas, North America (Medvedev, 1994; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Gramineae* (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Fenusia Leach, 1817

Synonym: *Kaliosysphinga* Tishbein, 1846; *Aphadnurus* Costa, 1859; *Phaenusa* Cameron, 1875; *Phoenusa* André, 1880; *Caliosysphinga* Konow, 1905; *Lithoryssus* Brues, 1906.

***Fenusia pusilla* Lepeletier, 1823**

Synonym: *F. ulmi* Sundevall, 1847; *F. intermedia* Thomson, 1871; *Messa alsia* MacGillivray, 1923; *Kaliofenusa pusilla laevinota* Benson, 1968; *K. carpini foliae* Liston, 1993; *K. altenhoferi* Liston, 1993.

Material Examined: Erzurum: University field, 1850 m, 31.V.1985, 1♂, 1♀, 2.VII.2002, 3♂♂, 7♀♀, 4.VIII.1981, 13♂♂, 39♀♀.

Distribution in Turkey: Erzurum (Özbek, 1986).

General Distribution: Europe, Turkey, Carpathia, Russia, North Caucasus, Mongolia, North America (Özbek, 1986; Medvedev, 1994; Liston, 1995); Holarctic.

Host Plant: Damage caused by the larva as a leaf miner was observed on several birch trees on the campus of Atatürk University, Erzurum. The population was very low. However, Özbek (1986) pointed out that there had been an outbreak of *F. pusilla* during 1982-1986 on the university campus and that 60% of the leaves of birch trees had dried up due to the damage caused by the larvae. *Betula* spp., *Alnus viridis*, *Ulmus glabra*, *U. minor*, *U. procera*, *U. laevis*, *U. Americana*, *U. elliptica* and *U. rubra* were listed as host plants by Lacourt (1999).

***Messa* Leach, 1817**

Synonym: *Fenusella* Enslin, 1914; *Melanobates* MacGillivray, 1916.

***Messa hortulana* (Klug, 1818)**

Synonym: *Phaenusa doederleini* De Stefani, 1883; *Fenusia ticina* Magretti, 1886.

Material Examined: Erzurum: University field, 1850 m, 1.V.1998, 1♀, 12-27.V.1996, 49♀♀, 22.V.1997, 23♀♀, 30.V.2002, 29♀♀, 7.VI.1996, 1♀; Oltu, Kaleboğazı, 1350 m, 25.IV.2000, 1♀, Uzundere, 1100 m, 10.V.2002, 11♀♀.

Distribution in Turkey: Erzurum (Güçlü and Özbek, 1999).

General Distribution: Europe, Russia, Central Asia, Transcaucasia, Romania, North Africa, North America (Benson, 1968; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: The larva is a leaf miner in poplar and trembling aspen (*Populus* spp.) leaves. There has been an outbreak since 2000 in Uzundere, Tortum, Narman, Oltu and İspir (Erzurum) along the narrow valleys. Almost all

of the poplar trees have been infested. Up to 12 larvae were counted in one leaf. Güçlü and Özbek (1999) reported that a similar outbreak occurred on the campus of Atatürk University and that infestation levels were 90% in some trees. Depending on the number of larvae feeding, 20-100% of leaves were destroyed. It is remarkable that as of 1999 this pest has completely disappeared from the University campus. *M. hortulana* is known as a pest of the maple and poplar in Europe (Buhr, 1941; Taeger and Blank, 1998; Lacourt 1999).

***Monophadnus* Hartig, 1837**

Synonym: *Doderia* Malaise, 1935

***Monophadnus pallescens* (Gmelin, 1790)**

Synonym: *M. rosarum* Konow, 1886, nec Brischke, 1883; *M. bipunctatus* MacGillivray, 1908, nec Klug, 1817; *M. furvus* Benson, 1930, nec Konow, 1898; *Tenthredo albipes* Gmelin, 1790, nec Geoffroy, 1785; *T. morio* Rossi, 1790, nec Fabricius, 1781; *Selandria tiliae* Norton, 1861; *Blennocampa emarginata* Thomson, 1871;:

Material Examined: Erzurum: Pasinler, 1700 m, 11.VI.1981, 1♀.

Distribution in Turkey: Rize and Trabzon (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Caucasus, Kazakhstan, Pacific Coastal Region, North America (Benson, 1968; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Ranunculus acris*, *R. repens*, *R. lanuginosus*, *Anemone nemorosa* (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

***Monophadnoides* Ashmead, 1898**

Synonym: *Pseudomonophadnus* Malaise, 1935

***Monophadnoides puncticeps* (Konow, 1886)**

Material Examined: Erzurum: Oltu, Kaleboğazı, 1350 m, 25.IV.2000, 1♀.

Distribution in Turkey: New record for Turkish fauna.

General Distribution: Europe, Central Asia, Siberia (Shaw, 1978; Lacourt, 1999); Asiatic-European.

Host Plant: *Filipendula ulmaria* (Lacourt, 1999).

***Stethomostus* Benson, 1939**

***Stethomostus fuliginosus* (Schrank, 1781)**

Synonym: *Tenthredo (Selandria) fusca* Audinet-Serville, 1823; *Selandria geniculata* Stephens, 1835; *Blennocampa croceipes* Costa, 1864; *B. athiops* Brischke, 1883; *Monophadnus fukaii* Rohwer, 1910.

Material Examined: Niğde: Ulukışla, Çiftehan, 1050 m, 08.VIII.1999, 1♂.

Distribution in Turkey: Ankara, Bolu and Rize (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Caucasus, Western Siberia, Mongolia, Japan, North America (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Ranunculus acris*, *R. repens*, *R. sceleratus* (Liston, 1995; Lacourt, 1999).

Tomostethus Konow, 1886

Tomostethus nigritus (Fabricius, 1804)

Synonym: *Tenthredo (Selandria) fraxini* Audinet-Serville, 1823; *T. (Allantus) brevicornis* Klug, 1816; *T. (A.) nigerrima* Klug, 1816.

Material Examined: Kars: Sarıkamış, Karakurt, 1650 m, 2.V.2000, 3♂, 2♀, 9.V.2002, 4♂, 5♀.

Distribution in Turkey: Medvedev (1994) indicated that *T. nigritus* occurred in Turkey, but supplied no location.

General Distribution: Europe, Turkey, Russia, Caucasus, Transcaucasia, North Africa (Medvedev, 1994; Liston, 1995; Lacourt, 1999); Sibero-European.

Host Plant: It was observed that the females deposited their eggs in young leaves of *Fraxinus excelsior* in the first week of May 2000. The emerging larvae feed on the leaves. Taeger and Blank (1998) and Lacourt (1999) gave *Fraxinus excelsior* as the host plant.

Subfamily Dolerinae

The members of Dolerinae closely resemble many genera of the Selandrinae. These species are small or medium-sized with a robust or oval body attaining a length of 6 to 11 mm. They are black with reddish yellow, a occasionally white, parts. The larvae are to be found in marshy, soggy meadows feeding on the leaves of sedge and rush and also on various grasses, sometimes including corn. The members of Dolerinae are found mostly in the Holarctic Region (Zombori, 1981).

Dolerus Panzer, 1801

Dolerus germanicus (Fabricius, 1775)

Synonym: *D. bajulus* Audinet-Serville, 1823; *D. fennicus* André, 1880; *Dosytheus xanthopus* Stephens, 1835; *Tenthredo abietis* Linne, 1761, nec Linne, 1758; *T. melanocephala* Geoffroy, 1785; *T. analis* Fabricius, 1793; *T. pedestris* Panzer, 1801; *T. eglanteriae* Klug, 1818; *T. quadricincta* Zetterstedt, 1838.

Material Examined: Artvin: Ardanuç, Cehennemderesi, 450 m, 13.V.2000, 1♀, Ferhatlı, 650 m, 7.VII.1994, 1♀; Ormanlı, 300 m, 12.V.2000, 1♀; Kalburlu, 300 m, 13.V.2000, 1♂, 1♀. Bayburt: Yolkenarı, 1750 m, 25 km Güney, 21.VI.2001, 5♀; Çalıdere, 1850 m, 16.VI.2000, 1♂, 1♀; Kopdağı, 2100-2300 m, 16.VI.2000, 4♂, 1♀; Maden, 1650 m, 16.VI.2000, 1♂. Bingöl: Çirişligeçidi, 2000 m, 3.VI.2001, 3♀. Erzincan: Tercan, Yaylacık, 10.VI.1999, 1♀. Erzurum: It is common and abundant in Erzurum province. The materials were collected from the middle of May to the end of July from Dumlu, Karagöbek, Konaklı, Köşk, University field, Yeşildere, Aşkale, Hınıs, Horasan, İlıca (Athikonak, Gülyurtbakımevi, Sorkunlu), İspir, Köprüköy (Örentaş), Oltu (Başaklı, Tutmaç), Pasinler and Uzungere (Gölbaşı) at altitudes of 1100-2400 m, 19♂, 36♀. Kars: Kağızman, Kuloğlu, 1600 m, 01.VII.2002, 1♀; Sarıkamış, Karakurt, TCK Çeşmesi, 1500-1600 m, 23.V.2001, 3♀, 1700 m, 4.VI.2000, 7♀.

Distribution in Turkey: Amasya, Erzurum, Gümüşhane, Isparta, Rize and Trabzon (Benson, 1968; Chevin and Chenon, 1982).

General Distribution: Europe, Turkey, Russia, Ukraine, Caucasus, Central Asia, Siberia (Benson, 1968; Cingovski, 1982; Liston, 1995; Lacourt, 1999); Asiatic-European.

Host Plant: *Equisetum palustre*, *E. arvense* (Liston, 1995; Taeger and Blank, 1998).

Dolerus haematodes Schrank, 1781

Synonym: *D. coerulescens* Hartig, 1837; *D. planatus*, auct., nec Hartig, 1837; *D. micans* Zaddach, 1859; *D. haematodes* var. *muliebris* Enslin, 1909; *D. haematodes* var. *rufatus* Enslin, 1913; *D. rufotorquatus* Costa, 1864; *Tenthredo opaca* Panzer, 1792, nec Fabricius, 1775; *T. collaris* Donovan, 1808.

Material Examined: Erzurum: Köşk, 1900 m, 26.V.2002, 6♂, 1♀, 1.VI.1995, 2♂, 1♀, 20.VI.1996, 1♂, 1♀; Pasinler, Büyükdere, 1800 m, 11.VII.1996, 1♀. Gümüşhane: Kale, 1300 m, 7.V.2002, 1♀.

Distribution in Turkey: Gümüşhane, Samsun and Trabzon (Benson, 1968).

General Distribution: Europe, Russia, Ukraine, Turkey, Transcaucasia, (Benson, 1968; Liston, 1995; Lacourt, 1999); Sibero-European.

Host Plant: Adults were collected from pastures. *Poa pratensis*, *P. palustris*, *Phleum pratense*, *Alopecurus pratense*, *Avena* spp., *Carex* spp., *Juncus* spp., *Scirpus* spp., *Triticum* spp. and *Cyperecaewere* were listed as host plants (Benson, 1968; Taeger and Blank, 1998; Lacourt, 1999).

***Dolerus puncticollis* C.G. Thomson, 1871**

Synonym: *D. croaticus* Konow, 1890.

Material Examined: Ardahan: 20.V.1972, 1♀. Bingöl: Çirişligecidi, 2000 m, 3.VI.2001, 1♀. Erzurum: 1850 m, 4.V.1980, 1♀, 1.VI.1983, 1♀, University field, 1850 m, 18.IV.2000, 1♀, 30.IV.2001, 4♀, 23.V.2002, 4♂; Aşkale, 1700 m, 23.V.2000, 1♂, 1♀, Pirnakapan, 1750 m, 18.V.2000, 1♂; Dumlu, Köşk, 1850 m, 26.V.2002, 1♂; İlica, Sorkunlu, 1900 m, 28.V.2000, 1♀; İspir, Madenköprübaşı, 1400 m, 17.VII.1992, 3♀; Oltu, 1400 m, 19.V.1999, 1♀, Balıca, 1400 m, 14.V.1997, 6♀, Kaleboğazı, 1350 m, 25.IV.2000, 5♂, 9♀, Sarışaz, 1450 m, 17.V.2000, 1♀, Tavşantepe, 1400 m, 11.IV.2001, 1♂; Pasinler, 1700 m, 10.VI.1983, 1♀; Şenkaya, Turnalı, 1750 m, 25.V.1994, 2♂. Gümüşhane: 20 km SE, 7.V.2002, 1♀. Kars: Sarıkamış, Karakurt, 1400 m, 2.V.2000, 1♀.

Distribution in Turkey: Erzurum, Gümüşhane, Rize and Samsun (Benson, 1968).

General Distribution: Europe, Russia, Ukraine, Caucasus, Turkey, Iran, Asia, Israel, Algeria (Benson, 1968; Cingovski, 1982; Lacourt, 1999); Asiatic-European.

Host Plant: Larvae feed on *Dactylis glomerata* and *Poa* spp. in pastures, particularly in the vicinities of wetlands. Taeger and Blank (1998) and Lacourt (1999) gave Graminae as host plants.

***Dolerus triplicatus* (Klug, 1818)**

Synonym: *D. trimaculatus* Audinet-Serville, 1823; *D. dimidiatus* Audinet-Serville, 1823; *D. lugubris* Gimmerthal, 1834; *Tenthredo tremula* Klug, 1818.

Material Examined: Artvin: Kalburlu, 300 m, 13.V.2000, 3♂. Bayburt: Kopdağı, 2300 m,

16.VI.2000, 1♂. Erzincan: Tercan, Yaylacık, 1600 m, 10.VI.1999, 3♂. Erzurum: University field, 1850 m, 3.VI.2000, 14♂, 10.VI.2000, 1♂, Köşk, 1850 m, 20.VI.1996, 1♂; Aras Vadisi, 1700 m, 23.V.2001, 2♂; Aşkale, 1700 m, 9.VI.1989, 1♂; İlica, Atlikonak, 2000m, 11.VI.2000, 2♀, Eğerti, 1900 m, 16.VI.2002, 4♂; Narman, Kireçlidağı, 2200 m, 2.VII.2000, 1♂; Oltu, Tutmaç-Başaklı, 2000 m, 1.VII.2000, 1♂; Pasinler, 1700 m, 3.VII.1983, 1♂; Tortum, Kireçlidağı, 2100 m, 25.VI.1999, 1♂. Kars: Karakurt, 1600 m, 23.V.2001, 1♂, 4.VI.2000, 5♂.

Distribution in Turkey: Ankara, Edirne, Erzurum and Gümüşhane (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Ukraine, Caucasus (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Sibero-European.

Host Plant: Adults were mostly collected from pastures. Liston (1995), and Tager and Blank (1998) gave *Juncus filiformis* and *J. effusus* as host plants of this species.

***Loderus* Konow, 1890**

Synonym: *Dicrodolerus* Goulet, 1986

***Loderus eversmanni* Kirby, 1882**

Synonym: *Tenthredo palmatus* auct., nec Klug, 1818; *Dolerus fumosus* Eversmann, 1847, nec Stephens, 1835; *D. trigeminus* Konow, 1884.

Material Examined: Bayburt: Kopdağı, 2300 m, 15.VI.2002, 1♀. Erzurum: Dumlu, 1850 m, 25.VI.2002, 1♂, Köşk, 1850 m, 20.VI.1996, 1♀; Aras Vadisi, 1700 m, 23.V.2001, 2♂, 2♀; Aşkale, Aşağıkop, 1900 m, 29.V.2001, 1♂; Horasan, 1700 m, 4.VI.2000, 2♀; Uzungere, Gölbaşı, 1000 m, 13.V.2000, 1♀. Kars: Sarıkamış, Karakurt, TCK Çeşmesi, 1600 m 4.VI.2000, 1♀.

Distribution in Turkey: Erzurum, Gümüşhane, Samsun and Trabzon, (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Ukraine, Caucasus, Transcaucasia, Siberia, Japan, Mongolia, China, North America (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Equisetum arvense*, *E. palustre* (Liston, 1995; Lacourt, 1999).

Loderus pratensis (Linne, 1758)

Material Examined: Bayburt: Maden, 1650 m, 16.VI.2000, 1♀. Erzurum: İlica, Sorkunlu, 1900 m, 28.V.2000, 2♂, 2♀.

Distribution in Turkey: New record for Turkish fauna.

General Distribution: Europe, Russia, Ukraine, Central Asia, Siberia, Mongolia, Kenya (Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Equisetum* spp., *E. heliocharis* (Liston, 1995; Lacourt, 1999).

Loderus vestigialis (Klug, 1818)

Synonym: *L. vestigialis* var. *ruficollis* Enslin, 1913; *Tenthredo vestigialis* var. *plaga* Klug, 1818; *Dolerus rufipes* Audinet-Serville, 1823;.

Material Examined: Artvin: Borçka, Karagöl, 1050 m, 8.VII.1994, 1♀. Erzurum: İlica, Sorkunlu, 1900 m, 28.V.2000, 1♀; Oltu, 1400 m, 19.V.1999, 1♂; Şenkaya, Turnalı, 1750 m, 15.V.1994, 1♂.

Distribution in Turkey: Gümüşhane, Rize and Trabzon (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Ukraine, Caucasus, Siberia, Japan, Iran, Pakistan, North America (Benson, 1968; Medvedev, 1994; Lacourt, 1999); Holarctic.

Host Plant: *Equisetum palustre*, *E. sylvaticum*, *E. arvense*, *E. pratense* (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Subfamily Nematinae

The species belonging to this family are mostly small or at most medium-sized, 3-11 mm long, with highly varied shapes, from very plump to cigar-shaped. In addition, they may be from light yellow or green to black. The representatives of this group are highly variable and are perhaps coming to the acme of their phylogenetic evolution having many external morphological characteristics. The larvae mostly feed freely on the leaves of their host plants. Some develop within galls, and others roll back the edges of leaves and feed within this tube. A number of species cause serious damage to forests. The members of Nematinae are almost exclusively confined to the northern hemisphere with nearly 40 valid genera, of which 17, in 2 tribes, are found in Europe (Zombori, 1984)

Cladius Illiger, 1807

Synonym: *Eudryas* Gistel, 1848

Cladius ordubadensis Konow, 1892

Material Examined: Artvin: Ormanlı, 300 m, 12.V.2000, 1♀. Erzurum: İlica, Atlikonak, 2000 m, 29.VI.1999, 1♀; Oltu, İnanmış, 1700 m, 26.VII.2000, 1♂; Şenkaya, Turnalı, 1750 m, 25.VII.1996, 1♀.

Distribution in Turkey: New record for Turkish fauna.

General Distribution: Holarctic Region (Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Rosa* spp., *Fragaria* spp., *Potentilla palustris*, *Filipendula ulmaria*, *Sanguisorba minor*, *S. officinalis*, *Alchemilla vulgaris* (Lacourt, 1999).

Cladius pectinicornis (Geoffroy, 1785)

Synonym: *C. geoffroyi* Audinet-Serville, 1823; *C. morio* Audinet-Serville, 1823; *C. rufipes* Blanchard, 1840; *C. isomerus* Norton, 1861; *C. ramicornis* André, 1880; *C. gracilicornis* Konow, 1884; *C. comari* Stein, 1886; *C. hyalinopterus* Konow, 1886; *C. ordubadensis* Konow, 1892; *C. palmicornis* Konow, 1892; *C. major* Cobelli, 1892; *C. orientalis* Cameron, 1902; *C. tibialatus* Konow, 1906; *Tenthredo alces* Thünberg, 1789; *T. difformis* Panzer, 1799; *Nematus crassicornis* Stephans, 1835.

Material Examined: Ankara: Bağlum, 21.VII.1995, 1♀. Artvin: Yusufeli, İşhan, 16.VI.2001, 1♂, 21.IX.2000, 1♂. Bayburt: Yoncalıkayası, 2700 m, 5.VII.2000, 1♂. Erzincan: Kemaliye, Başpınar, 950 m, 29.IX.1999, 1♀. Erzurum: University field, 1850 m, 14.VIII.1997, 1♀, Konaklı, 2000-2400 m, 22.VII.2000, 1♂; İlica, Atlikonak, 2000 m, 13.VI.2002, 1♂, Rizekent, 2000 m, 10.VIII.1999, 1♀, Sorkunlu, 1900 m, 10.VIII.1999, 1♂, 1♀; Köprüköy, Örenteş, 1900-2100 m, 12.VI.2000, 1♂; Oltu, Ayvalı, 1100 m, 20.IX.2000, 1♂, Sütkans, 1500 m, 25.VI.1996, 1♂; Olur, Yeşilbağlar, 1100 m, 16.VI.2001, 1♂; Şenkaya, Turnalı, 1750 m, 25.VII.1996, 1♀; Tortum, 1500 m, 27.VII.1998, 1♀, Aşağısivri, 1700 m, 19.VIII.1998, 5♀; Uzundere, Ulubağ, 1000 m, 20.IX.2000, 1♂. Kars: Sarıkamış, 1900 m, 9.VIII.2000, 1♂. Konya: Güneysinir, Gürğaç, 1000 m, 8.VIII.2002, 1♂, 1♀. Sille, 1050 m, 10.VIII.1999, 1♀.

Distribution in Turkey: Amasya, Bolu, Samsun and Tokat (Benson, 1968; Wolf, 1968).

General Distribution: Europe, Turkey, Transcaucasia, North Iran, Himalayas, North Asia, Siberia, Japan, North Africa, North America, (Benson, 1968; Cingovski, 1982; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: Larvae were collected on *Rosa* spp. Other host plants listed in the literature are: *Poterium sanguisorba*, *Lamiastrum galeobdolon*, *Rosa hybrida*, *R. luciae*, *R. mutiflora*, *R. wichuraiana*, *R. canina*, *R. acicularis*, *Filipendula ulmaria*, *Galeobdolon luteum*, *Sanguisorba minor*, *S. officinalis*, *Alchemilla vulgaris*, *Fragaria* spp. and *Potentilla palustris* (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

***Craesus* Leach, 1817**

Synonym: *Croesus* Curtis, 1824

***Craesus septentrionalis* (Linne, 1758)**

Synonym: *Tenthredo alni* Linne, 1758; *T. largipes* Retzius, 1783; *Nematus laticrus* Villaret, 1832; *N. stephensi* Newman, 1837.

Material Examined: Erzurum: University field, 1850 m, 23.V.1976, 12♂, 2♀, 5.VI.1976, 2♀, 6.VI.1983, 2♂, 1♀, 9.VI.1976, 8♂, 6♀, 15.VI.1976, 1♀, 16.VI.1976, 27♂, 2♀, 19.VI.2000, 1♂, 1♀, 9.VII.1973, 1♂, 20.VII.1999, 1♀.

Distribution in Turkey: Ankara, Edirne, İstanbul and Trabzon (Benson, 1968; Çanakçioğlu and Mol, 1998).

General Distribution: Europe, Turkey, Russia, Central Asia, Caucasus (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Asiatic-European.

Host Plant: Some larvae were observed feeding on the leaves of birch trees, *Betula verrucosa* on the campus of Atatürk University in June 2002. The population was very low, however. Özbek indicated that there was an outbreak of this species in the 1980s on the campus. Other hosts were listed as *Carpinus betulus*, *Alnus glutinosa*, *A. incana*, *Betula alba*, *B. pendula*, *Corylus avellana*, *Fraxinus excelsior*, *Populus* spp. and *Salix pentandra* by various authors (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

***Hoplocampa* Hartig, 1837**

Synonym: *Macgillivraya* Ashmead, 1898; *Macgillivrayella* Ashmead, 1898.

***Hoplocampa brevis* (Klug, 1816)**

Synonym: *Tenthredo (Selandria) fallax* Audinet-Serville, 1823.

Material Examined: Erzincan: 1300 m, 10.V.1980, 7♀.

Distribution in Turkey: It has a country-wide distribution in Turkey (Özbek et al., 1995).

General Distribution: Europe, Crete, Cyprus, Turkey, Russia, Transcarpathia, Moldova, Crimea, Transcaucasia, Caucasus, North America (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Sibero-European.

Host Plant: It is an important pear pest in the country (Erden, 1988; Özbek et al., 1995). Liston (1995) and Taeger and Blank (1998) gave *Malus* sp. and *Pyrus* spp. as host plants.

***Hoplocampa flava* (Linne, 1746)**

Synonym: *H. apicaris* Kirby, 1882; *H. minuta* auct. Angl., nec Christ, 1791; *Tenthredo pruni* L., 1758; *T. ruficapilla* Gmelin, 1790; *T. glaucopis* Rossi, 1790; *T. brunnea* Klug, 1816; *T. (Selandria) verticata* Audinet-Serville, 1823; *Hylotoma ferruginea* Fabricius, 1804; *H. simplex* Fallén, 1807.

Material Examined: Erzurum: Oltu, Kaleboğazı, 1350 m, 18.V.2001, 3♂, 4♀, Orcuk, 1400 m, 21.V.2001, 5♂, 3♀; Tortum, Aksu, 1500 m, 23.V.2002, 3♂, 5♀; Uzungere, Şelale, 1100 m, 16.V.2000, 7♂, 5♀.

Distribution in Turkey: Antalya (Benson, 1968).

General Distribution: Europe, Turkey, Israel, Russia, Transcaucasia, Caucasus, Baltic Region (Benson, 1968; Medvedev, 1994; Lacourt, 1999); Asiatic-European.

Host Plant: We observed that the larvae are important pest on young fruits of the wild plum, *Prunus* sp., along the narrow valleys of Oltu, Tortum and Uzungere districts. Özbek et al. (1995) also indicated that it is a destructive pest of wild plum in some locations in the north-east agricultural region of Turkey. Liston (1995), Taeger and Blank (1998) and Lacourt (1999) listed the hosts of this species as *Prunus avium*, *P. cerasus*, *P. domestica*, *P. mahaleb* and *P. spinosa*.

***Nematus* Panzer, 1801**

***Nematus myosotidis* Fabricius, 1804**

Synonym: *N. ephippiger* Hartig, 1840; *N. flavicomus* Tischbein, 1846; *N. nigricans* Eversmann, 1847; *N. breviusculus* Eversmann, 1847; *N. caudalus* Eversmann, 1847; *N. gemellus* Förster, 1854; *N. marshalli* Cameron, 1875; *N. cirrhostomus* Zaddach in Brischke, 1883; *Pristiphora myosotidis* Stephens, 1835.

Material Examined: Artvin: Şavşat, Karagöl, 1650 m, 8.VII.1998, 1♀. Erzincan: Kemaliye, Sandıklı, 1800 m, 2.VI.1982, 1♀.

Distribution in Turkey: Amasya, Giresun, Gümüşhane, Samsun and Trabzon (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Siberia, Armenia (Benson, 1968; Cingovski, 1982; Medvedev, 1994; Liston, 1995; Lacourt, 1999); West Palaearctic.

Host Plant: *Onobrychis* sp., *Trifolium* spp., *Vicia cracca*, *Lathyrus pratensis*, *Rubus* spp., *Potentilla* spp., *Geum* spp., *Filipendula ulmaria*, *Spiraea* spp. (Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Nematus viridescens Cameron, 1885

Synonym: *N. virescens* auct., nec Hartig, 1837; *Pteronidea poecilonotus* Zaddach, 1876.

Material Examined: Rize: Çamlıhemşin, Ayder, 1200-1550 m, 30.VII.2000, 3 ♀♀.

Distribution in Turkey: New record for Turkish fauna.

General Distribution: Europe, Russia, Central Asia (Liston, 1995; Lacourt, 1999).

Host Plant: *Betula alba*, *B. pendula* (Lacourt, 1999); Asiatic-European.

Pristiphora Latreille, 1810

Synonym: *Diphadnus* Hartig, 1837; *Neotomostethus* MacGillivray, 1908; *Sala Ross*, 1937.

Pristiphora fulvipes Fallen, 1808

Synonym: *P. vicina*, auct., nec Audinet-Serville, 1823; *Tenthredo fulvipes* Fallen, 1808, nec Scopoli, 1763.

Material Examined: Erzurum: Oltu, Çamlıbel, 1700 m, 14.VII.1996, 1♀, Sütkans, 1700 m, 25.VI.1996, 1♀; Pasinler, Pelitli, 2000 m, 14.VII.1998, 1♀.

Distribution in Turkey: Samsun and Trabzon (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Transcaucasia, Caucasus, Central Asia, Siberia, Korea (Benson, 1968; Medvedev, 1994; Lacourt, 1999); Asiatic-European.

Host Plant: Larvae feed on the leaves of *Salix* spp. Lacort (1999) gave *C. aurita* as the host plant of *P. fulvipes*.

Trichiocampus Hartig, 1837

Trichiocampus viminalis Fallen, 1808

Synonym: *Tenthredo viminalis* Fallen, 1808, nec Schrank, 1796; *Cladius eucera* Bouche, 1834; *C. luteicornis* Stephens, 1835; *C. luteiventris* Dahlbom, 1836; *Aulacomerus lutescens* Lintner, 1888; *Platycampus victoria* MacGillivray, 1920.

Material Examined: Erzurum: 1850 m, 3.VI.1985, 1♂, University field, 1850 m, 20.II.2001, 2♂♂, 7.V.2001, 5♂♂, 6♀♀, 25.VII.2000, 2♀♀, 7.VIII.1999, 2♀♀, 8.VIII.1999, 1♀, 20.VIII.1998, 1♀.

Distribution in Turkey: Antalya, Bursa, Edirne, Eskişehir, İstanbul, İzmit, Karabük and Konya (Baş, 1973; Chevin and Chenon, 1982; Çanakçioğlu and Mol, 1998).

General Distribution: Europe, Russia, (Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: Based on our observations, the larvae are a pest on *Populus nigra* and *P. tremula* on the campus of Atatürk University. Adults appear at the end of June, and the females deposit their shining eggs in 2 rows on the petioles of the leaves. In a week or 10 days the eggs hatch, and during July larvae are found feeding together mostly on the tips of the leaves, skeletonizing them. Later they scatter and continue feeding along the margins of the leaves, leaving only mid-ribs. Newly hatched larvae are nearly uniformly green and have conspicuous hairs. As they grow, the colour of the body changes to yellowish green and later in the full-grown stage to yellow. When fully grown, the larvae drop to the ground and enter the soil, where they later metamorphose within their cocoons to the pupal stage. It is an important defoliator of *Populus* species in some years, with outbreaks occurring at 2- to 4-year intervals on the campus. *Populus*, *Salix*; *Populus balsamifera*, *Salix caprea*, *Populus nigra*, *Populus tremula*, *P.t. x euAmericana*, *Populus nigra*, *P. balsamifera*, *P. x-canadensis*, *P. tremul* and *Salix caprea* were listed as the hosts of this species (Liston, 1995; Çanakçioğlu and Mol, 1998; Taeger and Blank, 1998; Lacourt, 1999).

Subfamily Selandrinae

The species belonging to this subfamily are mostly small or medium-sized, 3-15 mm long, frequently gracile and dark. The great majority of the larvae feed freely on the leaves of the host plant; some have mining habits, while one causes a gall and develops in that. The host

plants vary from ferns to arborescent plants. Selandrinae are distributed all over the world, being dominant in South-East Asia and in the tropical forests of South America. A total of some 170 genera are known, of which 35 are represented in Europe (Zombori, 1981).

Synonym: *Tenthredo ulmi* Schrank, 1802, nec Linne, 1758; *T. tristis* Audinet-Serville, 1823, nec Fabricius, 1804; *Emphytus infuscatus* Eversmann, 1847; *Selandria fabricii* Konow, 1885; *Melisandra morio* Fabricius, 1781.

Material Examined: Erzurum: Dumlu, 1850 m, 28.VII.1994, 1♀.

Distribution in Turkey: Ankara, Rize, Sinop and Trabzon (Benson, 1968).

General Distribution: Europe, Turkey, Russia, Ukraine, Transcaucasia, Caucasus, Siberia, Pacific Coastal Region, China, Korea, Japan, North America, (Benson,

1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Holarctic.

Host Plant: *Brachytecium reflexum*, *Ceratodon purpureus*, *Chenopodium album*, *Dicranum scoparium*, *Fragaria vesca*, *Hedwigia ciliata*, *Myosotis arvensis*, *Plagiommium cuspidatum*, *Plagiothecium denticulatum*, *Polygonum aviculare*, *Polytrichum commune*, *Pseudobryum cinclidioides*, *Sanionia uncinata*, *Stellaria media*, *Veronica chamaedrys*, *V. officinalis* (Taeger and Blank, 1998; Lacourt, 1999).

Selandria Leach, 1817

Selandria serva Fabricius, 1793

Synonym: *S. dorsalis* Stephens, 1835; *S. exica* Konow, 1885; *S. serva* var. *interstitialis* Konow, 1885, nec Thomson, 1871; *S. serva fuscitarsis* Benson, 1954; *Tenthredo serva* var. *mascula* Fallen, 1807; *T. socia* Klug, 1816; *T. (Allantus) lepida* Audinet-Serville, 1823; *T. serva* var. *mediocris* Le Peletier, 1823.

Material Examined: Erzurum: Yeşildere, 2000 m, 18.VI.1982, 2♂, 1♀, Oltu, Çamlıbel, 1750 m, 2.VII.1999, 1♀; Pasinler, 1700 m, 1.VIII.1983, 1♂.

Distribution in Turkey: Ankara, Erzurum, Giresun, İstanbul, Samsun, Tokat, Trabzon and Zonguldak (Benson, 1968; Chevin and Chenon, 1982).

General Distribution: Europe, Russia, Ukraine, Turkey, Iran, Transcaucasia, Caucasus, Siberia, Crimea, Pacific Coastal Region, Mongolia, China, Korea, Manchuria (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Asiatic-European.

Host Plant: Adults were collected on pastures and meadows. *Poa pratensis*, *Carex* spp., *Juncus* spp., *Triticum* spp., *Alopecurus pratensis*, *Festuca pratensis*, *Lolium* spp., *Phalaris arundinacea*, *Phleum pratense*, *Alopecurus pratensis* were listed as host plants of this species (Benson, 1968; Liston, 1995; Taeger and Blank, 1998; Lacourt, 1999).

Strongylogaster Dahlbom, 1835

Synonym: *Thrinax* Konow, 1885; *Pseudotaxonus* Costa, 1894; *Polystichophagus* Ashmead, 1898; *Prototaxonus* Rohwer, 1910.

Strongylogaster lineata Christ, 1791

Synonym: *S. iridipennis* Smith, 1874; *S. creyensis* Konow, 1887; *S. desbrochersi* Konow, 1891; *S. annularis* Matsumura, 1912; *Tenthredo lineata* Christ,

1791; *T. cingulata* Fabricius, 1793, nec Scopoli, 1763; *T. linearis* Klug, 1817, nec Schrank, 1781; *T. (Allantus) alternans* Audinet-Serville, 1823.

Material Examined: Artvin: Genye Dağı, 1800 m, 11.VII.2002, 1♀; Hopa, 200 m, 15.VIII.1994, 1♀.

Distribution in Turkey: İstanbul, Rize, Samsun and Sinop (Benson, 1968).

General Distribution: Europe, Crete, Turkey, Russia, Ukraine, Transcaucasia, Iran, Siberia, Japan, Taiwan, North Africa (Benson, 1968; Medvedev, 1994; Liston, 1995; Lacourt, 1999); Asiatic-European.

Host Plant: *Dryopteris* spp., *Matteuccia struthiopteris*, *Pteridium aquilinum* (Liston, 1995; Lacourt, 1999).

Discussion

Contributions to the knowledge of Turkish typical sawflies, Tenthredinidae, are treated in 2 parts. In the first part the subfamily Tenthredininae, and in the second part the subfamilies Blennocampinae, Dolerinae, Nematinae and Selandrinae are discussed. A total of 104 species in 33 genera are recorded. Of these *Cuneala koehleri* Klug, *Elinora baetica* Spinola, *Elinora ornata* André, *Macrophya militaris* Klug, *Macrophya teutonia* Panzer, *Tenthredo maculata* Geoffroy, *Tenthredo notha* Klug, *Tenthredo vespiformis* Schrank, *Tenthredopsis*

albonotata (Brullé), *Tenthredopsis festiva* Konow, *Tenthredopsis sordida* Klug (Tenthredininae), *Allantus vienensis* (Schrank), *Apethymus apicalis* (Klug), *Eutomostethus ephippium* (Panzer), *Monophadnoides puncticeps* (Konow) (Blennocampinae), *Loderus pratensis* (Linne) (Dolerinae), *Cladius ordubadensis* Konow and *Nematus viridescens* Cameron (Nematinae) were new records for Turkish fauna. In addition, *Elinora baetica*, *Tenthredo maculata* and *Tenthredopsis sordida* were new records for Asian fauna.

Lacourt (1999) listed 198 species in 60 genera occurring in Turkey in his catalogue. With the present contributions the numbers of recorded species of Tenthredinidae in Turkey has increased to 215. It is obvious that this figure is rather low if compared to the tenthredinid species occurring in some European countries, such as Germany (696), Switzerland (537), Romania (496), Italy (399), former Yugoslavia (285), Albania (131), Bulgaria (326) and Greece (114) (Liston, 1995), although Turkey has a larger surface area than all of these countries. This must be related to a lack of knowledge. Unfortunately, from a faunistic point of view, our knowledge with regard to Turkey is far from complete. As indicated previously, only 4 papers have been devoted to the sawfly fauna of the country (Guichard and Harvey, 1967; Benson, 1968; Wolf, 1968 Chevin and Chenon, 1982). On the other hand, the percentage of

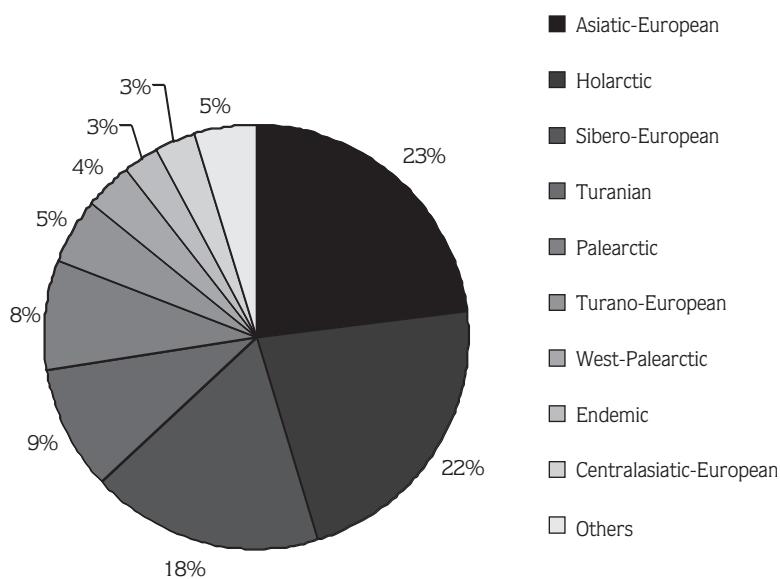

Figure. Percentage of chorotypes found in the typical sawflies (Tenthredinidae) of Anatolia. A total of 104 species were considered.

endemic species was also very low, with only 3 species, *Cuneala amasiensis* (Kriechbaumer), *Elinora asiatica* (Enslin), and *Tenthredopsis harveyi* (Benson) being endemics. The first 2 species have Anatolia-wide distributions. *Tenthredopsis harveyi* was described from only one female from Bolu (Benson, 1968). Since the time of that description a second female has been found in Erzurum. The distributions of these 3 species are not restricted to any particular part of Anatolia. Therefore, they can be regarded as Anatolian endemics, instead of West Anatolian or East Anatolian endemics.

It is possible that the real number of Tenthredinidae must be higher than recorded so far in Turkey because of its geographical position, climatic conditions and topographical structure. Anatolia is an important center of endemic speciation, as well as species richness, for many groups of insects. Based on this study it is evident that the Tenthredinidae fauna of Turkey is very poorly known, and must be carefully investigated. We suspect that many undescribed taxa remain to be discovered.

Based on their distributions, the typical sawflies recorded in the present study can be arranged in 14 chorotypes (Figure). The Asiatic-European elements are the most abundant, representing 23% of the whole fauna, followed by the Holarctic and Sibero-European elements with 22% and 18% respectively. Chorotypes representing large areas, such as the Holarctic,

Palaearctic, West Palaearctic, Asiatic-European, Central Asiatic-European and Sibero-European comprised 77% of all the species. Mediterranean, Turano-Mediterranean, Central Asiatic-Mediterranean, Turano-Anatolian, and Irano-Anatolian chorotypes were represented by 1 species each. Turanian and Turano-European chorotypes had 10 and 5 species respectively, and constituted about 14% of all the species. Interestingly, the species representing new records have similar distributions to previously known species. They can be grouped in 8 chorotypes: the Sibero European has 5 species, and the Holarctic and Asiatic-European have 4 and 3 species, respectively. The Mediterranean, Turano-Anatolian, Turanian and Palaearctic chorotypes are represented by 1 species, and the Turano-European by 2 species.

Since the typical sawfly species recorded in Anatolia were mostly in chorotypes occupying large areas, such as the Holarctic, Palaearctic, Asiatic-European and Sibero-European etc., we assume that most of the species could have reached the Anatolian Peninsula from Europe and the Mediterranean Region. Although a Turanian influence is present, the European and Mediterranean influence predominates. However, we must admit that because of inadequate information on the typical sawfly fauna of Turkey we are unable to postulate a center for origin of the tenthredinids, of their Anatolian colonization routes.
