

Toxic Substance Control Act PCB/Radioactive Waste Annual Inventory for Calendar Year 2006

June 2007

The INL is a U.S. Department of Energy National Laboratory
operated by Battelle Energy Alliance

Toxic Substance Control Act PCB/Radioactive Waste Annual Inventory for Calendar Year 2006

June 2007

**Idaho National Laboratory
Idaho Falls, Idaho 83415**

<http://www.inl.gov>

**Prepared for the
U.S. Department of Energy
Assistant Secretary for Environmental Management
Under DOE Idaho Operations Office
Contract DE-AC07-05ID14517**

TABLE OF CONTENTS

- Section I. Continuing Attempts to Secure Disposal of PCB/Radioactively Contaminated Waste**
- Section II. PCB/Radioactive Waste In Storage Awaiting Disposal (excluding the Advanced Mixed Waste Treatment Project)**
- Section III. PCB/Radioactive Waste Disposed or Shipped for Disposal During Calendar Year 2006 (excluding the Advanced Mixed Waste Treatment Project)**
- Section IV. PCB/Radioactive Waste In Storage at the Advanced Mixed Waste Treatment Project Awaiting Disposal**
- Section V. PCB/Radioactive Waste Disposed or Shipped for Disposal from the Advanced Mixed Waste Treatment Project During Calendar Year 2006**

-

Section I:

Continuing Attempts to Secure Disposal of PCB/Radioactively Contaminated Waste

Continuing Attempts to Secure Disposal of PCB/Radioactively Contaminated Waste

The Toxic Substance Control Act regulations of 40 CFR 761.65(a)(2)(ii) requires a written record documenting all continuing attempts to secure disposal of polychlorinated biphenyl (PCB)/radioactive waste. The written record must be available for inspection or submission to the Environmental Protection Agency (EPA) if requested. EPA Region 10 has requested the information be submitted to the agency on or before July 15 for the previous calendar year. Included with the information on attempts to secure disposal of PCB/Radioactive waste, the Department of Energy (DOE) has been requested to submit an inventory of PCB/Radioactive waste in storage at the Idaho National Laboratory (INL) for the previous calendar year.

The following are attempts made by the INL (excluding the Advanced Mixed Waste Treatment Project) to secure disposal of PCB/Radioactive waste:

1. A total of forty three (43) items or containers totaling approximately 40,672 kg of radioactively contaminated PCBs were shipped for disposal, or disposed during the calendar year 2006. Facilities used for disposal included a TSCA permitted incinerator capable of burning radioactively contaminated PCB liquids; and RCRA permitted subtitle C facilities capable of accepting radioactively contaminated PCB solids.
2. A modification to the Waste Isolation Pilot Plant (WIPP) Waste Acceptance Criteria (WAC) to allow the disposal of PCB remediation and PCB bulk product waste contaminated with transuranic isotopes has been granted by EPA Region 6 to the DOE-Carlsbad Office. The WIPP disposal site now becomes an option for some radioactively contaminated PCB wastes in storage at the INL.
3. It is expected that some PCB containers stored at the AMWTP will be disposed at WIPP as PCB Remediation waste since the WIPP WAC allows disposal of this type of waste as well as PCB Bulk Product waste contaminated with transuranic isotopes. Acceptable knowledge documentation was established on August 24, 2005..... These containers were added to the 2005 report.
4. A total of one hundred ninety seven (197) items or containers totaling approximately 27,685 kg of radioactively contaminated PCBs from the AMWTP were shipped for disposal, or disposed during calendar year 2006 at WIPP.

Section II:

**PCB/Radioactive Waste in Storage Awaiting Disposal (excluding the
Advanced Waste Treatment Project)**

Idaho National Laboratory
Radioactive PCB Waste Inventory
Calendar Year 2006

Advanced Mixed Waste Treatment Project
Radioactive PCB Waste Inventory
Calendar Year 2006

QUANTITY	CONTAINER ID #	DESCRIPTION	FOOTNOTE	WEIGHT (Kg) (1)	OUT OF SERVICE DATE
----------	----------------	-------------	----------	--------------------	---------------------------

Total Number of Items: 8008

Total Weight : 955,238

(1) Containers with identification numbers beginning with ID denote containers that have not been retrieved from the Transuranic Storage and Retrieval Enclosure. Weights for these containers are derived from historical data. Where the weight is listed as zero, no historical data was available

(2) The out-of-service date of August 24, 2005 reflects the date that Acceptable Knowledge Documentation established that the waste contains potentially regulated amounts of PCB

Section V:
