

Final Technical Report

Title: Partial Support for US Participants in the 5th International Marine Biotechnology Conference, Townsville, Australia Sept 29-Oct 5, 2000

Project ID: 0005189

Program Manager: Dr. Anna Palmisano

PI: Dr. Yonathan Zohar

Award Register: ER62896 0005189 DE-FG02-00ER62896

COMB Number: 035-27201

Funding was provided for Travel Awards for US participants in the 5th International Marine Biotechnology Conference held in Townsville, Australia Sept 29-Oct 5, 2000. This was an extremely successful scientific meeting with over 300 participants from more than 30 countries in attendance. The US was well-represented with 49 participants, including scientists at every level from senior researchers presenting Keynote and Plenary addresses to junior scientists, Postdoctoral Researchers and graduate students. Funding for travel awards, in addition to the DOE contribution, was provided by the Office of Naval Research, the National Science Foundation, Maryland Sea Grant, the Society for Industrial Microbiology, the Center of Marine Biotechnology and Dynamac Corporation Environmental Services. Travel assistance is likely to have significantly increased the number of participants from the US, especially more junior participants who may not otherwise have had any funds available to attend this meeting. Attendance at the conference was valuable in gaining insights into the latest developments in the important emerging discipline of Marine Biotechnology.

Funding from DOE was used specifically for Travel Awards for the following participants in the IMBC meeting:

Dr. Craig Cary, Associate Professor, College of Marine Studies, University of Delaware.

Dr. Feng Chen, Assistant Professor, Center of Marine Biotechnology

Dr. Dennis Maeder, Postdoctoral Associate, Center of Marine Biotechnology

Dr. Steve Taylor, Assistant Research Chemist, CMBB, Scripps Institution of Oceanography

Dr. Bradley Tebo, Research Biologist and Senior Lecturer, Marine Biology Research Division, Scripps Institution of Oceanography

Dr. Joy Watts, Postdoctoral Associate, Center of Marine Biotechnology

In summary, the DOE funds were successfully used to advance participation by US scientists in the important emerging field of Marine Biotechnology.
