FULL PAPER *Physiology*

Analysis of L-type amino acid transporter in canine hepatocellular carcinoma

Kikumi OGIHARA, Yuko NAYA, Reiichiro SATO, Ken ONDA and Hideharu OCHIAI

Vol. 77, No. 5 (2015), p. 527, lines 5 to 1 from the bottom in the right column

While Kadosawa *et al.* reported the LAT1 expression in the canine mammary gland tumor and melanoma in the veterinary clinic [9–11], little information is available concerning LAT expression in hepatocellular carcinoma cells (HCCs) of dog.

should have been

While Fukumoto *et al.* reported the LAT1 expression in the canine mammary gland tumor and melanoma in the veterinary clinic [9–11], little information is available concerning LAT expression in hepatocellular carcinoma cells (HCCs) of dog.
