

SUBJECT INDEX

- 2.5D simulation
 2.5D Simulation of basin-edge effects on the ground motion characteristics 463
- Active and weak spells
 On breaks of the Indian monsoon 529
- Aftershock
 Statistical parameters of Bhuj earthquake sequence of January 26th, 2001 397
- Aftershock activity
 Aftershocks of 26th January 2001 Bhuj earthquake and seismotectonics of the Kutch region 385
- Aftershocks
 An eyewitness account of the Bhuj earthquake 347
 Aftershock activity of Bhuj earthquake of January 26th, 2001 391
 Study of the epicentral trends and depth sections for aftershocks of the 26th January 2001, Bhuj earthquake in western India 401
 Fault plane solutions of the January 26th, 2001 Bhuj earthquake sequence 413
- Air-sea coupling
 Some salient features of the atmosphere observed over the north Bay of Bengal during BOBMEX 131
- Airy stress function
 2-D Deformation analysis of a half-space due to a long dip-slip fault at finite depth 587
- Analytic signal
 2D Stabilised analytic signal method in DC pole-pole potential data interpretation 37
- Anomalous resistivity
 Ion acoustic instability of HPT particles, FAC density, anomalous resistivity and parallel electric field in the auroral region 559
- BOBMEX
 A study on the structure of the convective atmosphere over the Bay of Bengal during BOBMEX-99 147
 Circulation characteristics of a monsoon depression during BOBMEX-99 using high-resolution analysis 165
 Observed daily large-scale rainfall patterns during BOBMEX-1999 223
 Thermohaline features of the subsurface cyclonic eddy in the south central Bay of Bengal during August 1999 233
 Synoptic weather conditions during BOBMEX 239
- BOBMEX-99
 Observations of wind and waves in the central Bay of Bengal during BOBMEX-99 and their effect on mixed layer depth variability due to forced mixing 255
 An experimental study of radiative fluxes in the south Bay of Bengal during BOBMEX 1999 267
- Ocean-atmosphere interaction and synoptic weather conditions in association with the two contrasting phases of monsoon during BOBMEX-1999 283
- Baseline lengths
 Pre-seismic, co-seismic and post-seismic displacements associated with the Bhuj 2001 earthquake derived from recent and historic geodetic data 331
- Basin-edge effects
 2.5D Simulation of basin-edge effects on the ground motion characteristics 463
- Bay of Bengal
 A study on the structure of the convective atmosphere over the Bay of Bengal during BOBMEX-99 147
 Study of total column atmospheric aerosol optical depth, ozone and precipitable water content over Bay of Bengal during BOBMEX-99 205
 Observed daily large-scale rainfall patterns during BOBMEX-1999 223
 An experimental study of radiative fluxes in the south Bay of Bengal during BOBMEX 1999 267
- Bay of Bengal Monsoon Experiment
 Thermodynamic structure of the marine atmosphere over the region 80–87° E along 13° N during August (phase II) BOBMEX-99 295
- Bhavnagar
 Dissolved helium and TDS in groundwater from Bhavnagar in Gujarat: Unrelated to seismic events between August 2000 and January 2001 51
- Bhuj
 Fault plane solutions of the January 26th, 2001 Bhuj earthquake sequence 413
- Bhuj earthquake
 Pre-seismic, co-seismic and post-seismic displacements associated with the Bhuj 2001 earthquake derived from recent and historic geodetic data 331
 An eyewitness account of the Bhuj earthquake 347
 A media-based assessment of damage and ground motions from the January 26th, 2001 M7.6 Bhuj, India earthquake 353
 Aftershocks of 26th January 2001 Bhuj earthquake and seismotectonics of the Kutch region 385
 Aftershock activity of Bhuj earthquake of January 26th, 2001 391
 Study of the epicentral trends and depth sections for aftershocks of the 26th January 2001, Bhuj earthquake in western India 401
 A simulation of earthquake induced undrained pore pressure changes with bearing on some soil liquefaction observations following the 2001 Bhuj earthquake 471
- Boundary layer
 Some salient features of the atmosphere observed over the north Bay of Bengal during BOBMEX 131

- b*-value
 Aftershock activity of Bhuj earthquake of January 26th, 2001 391
 Statistical parameters of Bhuj earthquake sequence of January 26th, 2001 397
- Carbonaceous chondrite
 Determination of rare earth and refractory trace element abundances in early solar system objects by ion microprobe 485
- Chondrule
 Laser microprobe for the study of noble gases and nitrogen in single grains: A case study of individual chondrules from the Dhajala meteorite 113
- Classical and normalised standard spectral ratio
 Estimation of S-wave site response in and around Delhi region from weak motion data 441
- Coda waves
 CODA Q estimates for Kumaun Himalaya 569
- Collapse
 Iseismsals for the Kutch earthquake of 26th January 2001 375
- Conserved variable diagrams
 Thermodynamic structure of the marine atmosphere over the region 80–87° E along 13° N during August (phase II) BOBMEX-99 295
- Containment reinforcement
 Behaviour of masonry structures during the Bhuj earthquake of January 2001 431
- Continental earthquakes
 Flexure of the Indian plate and intraplate earthquakes 315
- Continental erosion
 Flexure of the Indian plate and intraplate earthquakes 315
- Contour map
 2-D Deformation analysis of a half-space due to a long dip-slip fault at finite depth 587
- Convection
 A study on the structure of the convective atmosphere over the Bay of Bengal during BOBMEX-99 147
 Observed daily large-scale rainfall patterns during BOBMEX-1999 223
- Cyclonic eddy
 Thermohaline features of the subsurface cyclonic eddy in the south central Bay of Bengal during August 1999 233
- Damage
 Performance of elevated tanks in M_w 7.7 Bhuj earthquake of January 26th, 2001 421
- Damage survey
 Iseismsals for the Kutch earthquake of 26th January 2001 375
- Decay constant
 Statistical parameters of Bhuj earthquake sequence of January 26th, 2001 397
- Deep resistivity sounding
 Effects of galvanic distortions on magnetotelluric data: Interpretation and its correction using deep electrical data 27
- Deformation
 2-D Deformation analysis of a half-space due to a long dip-slip fault at finite depth 587
- Delhi telemetry network
 Estimation of S-wave site response in and around Delhi region from weak motion data 441
- Depositional environment
 Late Quaternary sea level and environmental changes from relic carbonate deposits of the western margin of India 1
- Depth section
 Study of the epicentral trends and depth sections for aftershocks of the 26th January 2001, Bhuj earthquake in western India 401
- Dharwar craton
 Structural appraisal of the Gadag schist belt from gravity investigations 577
- Digital telemetered seismic network
 CODA Q estimates for Kumaun Himalaya 569
- Dip-slip fault
 2-D Deformation analysis of a half-space due to a long dip-slip fault at finite depth 587
- Discrete Element Method
 Numerical simulation of liquefaction behaviour of granular materials using Discrete Element Method 479
- Displacements
 Pre-seismic, co-seismic and post-seismic displacements associated with the Bhuj 2001 earthquake derived from recent and historic geodetic data 331
- Ductility
 Behaviour of masonry structures during the Bhuj earthquake of January 2001 431
- Earthquake resistance
 Behaviour of masonry structures during the Bhuj earthquake of January 2001 431
- Earthquakes
 Performance of elevated tanks in M_w 7.7 Bhuj earthquake of January 26th, 2001 421
- Elevated water tanks
 Performance of elevated tanks in M_w 7.7 Bhuj earthquake of January 26th, 2001 421
- Energy
 Statistical parameters of Bhuj earthquake sequence of January 26th, 2001 397
- Energy budgets
 The Indian summer monsoon as revealed by the NCMRWF system 95
- Epicentral trend
 Study of the epicentral trends and depth sections for aftershocks of the 26th January 2001, Bhuj earthquake in western India 401
- Equatorial Indian Ocean
 Indian Ocean surface winds from NCMRWF analysis as compared to QuikSCAT and moored buoy winds 61
- FACs
 Ion acoustic instability of HPT particles, FAC density, anomalous resistivity and parallel electric field in the auroral region 559
- Fault-plane solution
 Fault plane solutions of the January 26th, 2001 Bhuj earthquake sequence 413
- Flexural bulge
 Flexure of the Indian plate and intraplate earthquakes 315
- Flexure
 Flexure of the Indian plate and intraplate earthquakes 315
- Forced mixing
 Observations of wind and waves in the central Bay of Bengal during BOBMEX-99 and their effect

- on mixed layer depth variability due to forced mixing 255
- Foreshock
Statistical parameters of Bhuj earthquake sequence of January 26th, 2001 397
- Gadag schist belt
Structural appraisal of the Gadag schist belt from gravity investigations 577
- Galvanic distortion
Effects of galvanic distortions on magnetotelluric data: Interpretation and its correction using deep electrical data 27
- Geodesy
Pre-seismic, co-seismic and post-seismic displacements associated with the Bhuj 2001 earthquake derived from recent and historic geodetic data 331
- Global Positioning System (GPS)
Pre-seismic, co-seismic and post-seismic displacements associated with the Bhuj 2001 earthquake derived from recent and historic geodetic data 331
- Gravity method
Structural appraisal of the Gadag schist belt from gravity investigations 577
- Great Triangulation Survey (GTS)
Pre-seismic, co-seismic and post-seismic displacements associated with the Bhuj 2001 earthquake derived from recent and historic geodetic data 331
- Ground motion prediction
2.5D Simulation of basin-edge effects on the ground motion characteristics 463
- Ground motions
A media-based assessment of damage and ground motions from the January 26th, 2001 M7.6 Bhuj, India earthquake 353
- Groundwater
Dissolved helium and TDS in groundwater from Bhavnagar in Gujarat: Unrelated to seismic events between August 2000 and January 2001 51
- HPT
Ion acoustic instability of HPT particles, FAC density, anomalous resistivity and parallel electric field in the auroral region 559
- Helium
Dissolved helium and TDS in groundwater from Bhavnagar in Gujarat: Unrelated to seismic events between August 2000 and January 2001 51
- Hibonite
Determination of rare earth and refractory trace element abundances in early solar system objects by ion microprobe 485
- High-resolution analysis
Circulation characteristics of a monsoon depression during BOBMEX-99 using high-resolution analysis 165
- India
Flexure of the Indian plate and intraplate earthquakes 315
- Indian monsoon
On breaks of the Indian monsoon 529
- Indian monsoon rainfall
Indian monsoon variability in relation to Regional Pressure Index 521
- Indian summer monsoon
Ocean-atmosphere interaction and synoptic weather conditions in association with the two contrasting phases of monsoon during BOBMEX-1999 283
- Intensity
A media-based assessment of damage and ground motions from the January 26th, 2001 M7.6 Bhuj, India earthquake 353
- Interseasonal variability
The Indian summer monsoon as revealed by the NCMRWF system 95
- Intraseasonal oscillation
Synoptic weather conditions during BOBMEX 239
- Intraseasonal variation
On breaks of the Indian monsoon 529
- Inversion
Structural appraisal of the Gadag schist belt from gravity investigations 577
- Ion microprobe
Determination of rare earth and refractory trace element abundances in early solar system objects by ion microprobe 485
- Isoseismal map
Isoseismals for the Kutch earthquake of 26th January 2001 375
- Joint inversion
Effects of galvanic distortions on magnetotelluric data: Interpretation and its correction using deep electrical data 27
- Kumaun Himalaya
CODA Q estimates for Kumaun Himalaya 569
- Kutch
An eyewitness account of the Bhuj earthquake 347
- Kutch region
Aftershocks of 26th January 2001 Bhuj earthquake and seismotectonics of the Kutch region 385
- Laser
Laser microprobe for the study of noble gases and nitrogen in single grains: A case study of individual chondrules from the Dhajala meteorite 113
- Late Quaternary sea level
Late Quaternary sea level and environmental changes from relic carbonate deposits of the western margin of India 1
- Limited area model
Prediction of monsoon rainfall with a nested grid mesoscale limited area model 499
- Liquefaction
Numerical simulation of liquefaction behaviour of granular materials using Discrete Element Method 479
- Local network
Aftershock activity of Bhuj earthquake of January 26th, 2001 391
- Local site condition
Estimation of S-wave site response in and around Delhi region from weak motion data 441
- MEQ network
Study of the epicentral trends and depth sections for aftershocks of the 26th January 2001, Bhuj earthquake in western India 401
- MLD variability
Observations of wind and waves in the central Bay of Bengal during BOBMEX-99 and their effect on mixed layer depth variability due to forced mixing 255
- MM intensities
Isoseismals for the Kutch earthquake of 26th January 2001 375

- MM5
Circulation characteristics of a monsoon depression during BOBMEX-99 using high-resolution analysis 165
- Magnetotelluric
Effects of galvanic distortions on magnetotelluric data: Interpretation and its correction using deep electrical data 27
- Mainshock
Fault plane solutions of the January 26th, 2001 Bhuj earthquake sequence 413
- Marine boundary layer
Simulation of marine boundary layer characteristics using a 1-D PBL model over the Bay of Bengal during BOBMEX-99 185
- Marine boundary layer
Thermodynamic structure of the marine atmosphere over the region 80–87° E along 13° N during August (phase II) BOBMEX-99 295
- Masonry
Behaviour of masonry structures during the Bhuj earthquake of January 2001 431
- Mass spectrometer
Laser microprobe for the study of noble gases and nitrogen in single grains: A case study of individual chondrules from the Dhajala meteorite 113
- Meso-scale convective system
Prediction of monsoon rainfall with a nested grid mesoscale limited area model 499
- Meteorite
Laser microprobe for the study of noble gases and nitrogen in single grains: A case study of individual chondrules from the Dhajala meteorite 113
- Mid-plate seismicity
Flexure of the Indian plate and intraplate earthquakes 315
- Monsoon
Some salient features of the atmosphere observed over the north Bay of Bengal during BOBMEX 131
Observed daily large-scale rainfall patterns during BOBMEX-1999 223
- Monsoon breaks
On breaks of the Indian monsoon 529
- Monsoon depression
A study on the structure of the convective atmosphere over the Bay of Bengal during BOBMEX-99 147
Circulation characteristics of a monsoon depression during BOBMEX-99 using high-resolution analysis 165
Synoptic weather conditions during BOBMEX 239
Prediction of monsoon rainfall with a nested grid mesoscale limited area model 499
- Monsoon disturbances
Ocean-atmosphere interaction and synoptic weather conditions in association with the two contrasting phases of monsoon during BOBMEX-1999 283
- Monsoon rainfall
Prediction of monsoon rainfall with a nested grid mesoscale limited area model 499
- Monsoon trough
Ocean-atmosphere interaction and synoptic weather conditions in association with the two contrasting phases of monsoon during BOBMEX-1999 283
- NCMRWF analysed winds
Indian Ocean surface winds from NCMRWF analysis as compared to QuikSCAT and moored buoy winds 61
- Nitrogen
Laser microprobe for the study of noble gases and nitrogen in single grains: A case study of individual chondrules from the Dhajala meteorite 113
- Noble gases
Laser microprobe for the study of noble gases and nitrogen in single grains: A case study of individual chondrules from the Dhajala meteorite 113
- Numerical modeling
Numerical simulation of liquefaction behaviour of granular materials using Discrete Element Method 479
- OLR
Synoptic weather conditions during BOBMEX 239
- Ocean surface forcing
Indian Ocean surface winds from NCMRWF analysis as compared to QuikSCAT and moored buoy winds 61
- Ocean-atmosphere interaction
Ocean-atmosphere interaction and synoptic weather conditions in association with the two contrasting phases of monsoon during BOBMEX-1999 283
- Orographic rainfall
Prediction of monsoon rainfall with a nested grid mesoscale limited area model 499
- Out-of-plane failure
Behaviour of masonry structures during the Bhuj earthquake of January 2001 431
- Ozone
Study of total column atmospheric aerosol optical depth, ozone and precipitable water content over Bay of Bengal during BOBMEX-99 205
- Parallel electric field
Ion acoustic instability of HPT particles, FAC density, anomalous resistivity and parallel electric field in the auroral region 559
- Physical feeling
An eyewitness account of the Bhuj earthquake 347
- Precipitable water content
Study of total column atmospheric aerosol optical depth, ozone and precipitable water content over Bay of Bengal during BOBMEX-99 205
- Prediction of MLD
Observations of wind and waves in the central Bay of Bengal during BOBMEX-99 and their effect on mixed layer depth variability due to forced mixing 255
- Q_c
CODA Q estimates for Kumaun Himalaya 569
- Radiation pattern
2.5D Simulation of basin-edge effects on the ground motion characteristics 463
- Radiative fluxes
An experimental study of radiative fluxes in the south Bay of Bengal during BOBMEX 1999 267
- Rainfall analysis
Observed daily large-scale rainfall patterns during BOBMEX-1999 223

- Rare earth element
 Determination of rare earth and refractory trace element abundances in early solar system objects by ion microprobe 485
- Receiver function
 Estimation of S-wave site response in and around Delhi region from weak motion data 441
- Regional Pressure Index
 Indian monsoon variability in relation to Regional Pressure Index 521
- Regional model
 Impact of horizontal resolution on prediction of tropical cyclones over Bay of Bengal using a regional weather prediction model 79
- Regularisation
 2D Stabilised analytic signal method in DC pole-pole potential data interpretation 37
- Reinforced concrete
 Performance of elevated tanks in M_w 7.7 Bhuj earthquake of January 26th, 2001 421
- Resolution
 Impact of horizontal resolution on prediction of tropical cyclones over Bay of Bengal using a regional weather prediction model 79
- Reverse faulting
 Fault plane solutions of the January 26th, 2001 Bhuj earthquake sequence 413
- Rosby wave
 Thermohaline features of the subsurface cyclonic eddy in the south central Bay of Bengal during August 1999 233
- Rural houses
 Isoseismals for the Kutch earthquake of 26th January 2001 375
- Sagardhwani
 Thermohaline features of the subsurface cyclonic eddy in the south central Bay of Bengal during August 1999 233
- Satellite
 Study of total column atmospheric aerosol optical depth, ozone and precipitable water content over Bay of Bengal during BOBMEX-99 205
- Saturation point
 Thermodynamic structure of the marine atmosphere over the region 80–87° E along 13° N during August (phase II) BOBMEX-99 295
- Scatterometer winds
 Indian Ocean surface winds from NCMRWF analysis as compared to QuikSCAT and moored buoy winds 61
- Sea breeze
 Thermodynamic structure of the marine atmosphere over the region 80–87° E along 13° N during August (phase II) BOBMEX-99 295
- Secondary electric potentials
 2D Stabilised analytic signal method in DC pole-pole potential data interpretation 37
- Seismicity
 Dissolved helium and TDS in groundwater from Bhavnagar in Gujarat: Unrelated to seismic events between August 2000 and January 2001 51
- Seismotectonics
 Aftershocks of 26th January 2001 Bhuj earthquake and seismotectonics of the Kutch region 385
- Sensible and latent heat fluxes
 Simulation of marine boundary layer characteristics using a 1-D PBL model over the Bay of Bengal during BOBMEX-99 185
- Shaft support
 Performance of elevated tanks in M_w 7.7 Bhuj earthquake of January 26th, 2001 421
- Ship
 Study of total column atmospheric aerosol optical depth, ozone and precipitable water content over Bay of Bengal during BOB MEX-99 205
- Single backscattering model
 CODA Q estimates for Kumaun Himalaya 569
- Site effects by generalised inversion
 Estimation of S-wave site response in and around Delhi region from weak motion data 441
- Site response
 Estimation of S-wave site response in and around Delhi region from weak motion data 441
- Size distribution
 Study of total column atmospheric aerosol optical depth, ozone and precipitable water content over Bay of Bengal during BOBMEX-99 205
- Soft storey
 Isoseismals for the Kutch earthquake of 26th January 2001 375
- Soil liquefaction
 A simulation of earthquake induced undrained pore pressure changes with bearing on some soil liquefaction observations following the 2001 Bhuj earthquake 471
- Solar nebula
 Determination of rare earth and refractory trace element abundances in early solar system objects by ion microprobe 485
- Staging
 Performance of elevated tanks in M_w 7.7 Bhuj earthquake of January 26th, 2001 421
- Static shift
 Effects of galvanic distortions on magnetotelluric data: Interpretation and its correction using deep electrical data 27
- Strain
 Pre-seismic, co-seismic and post-seismic displacements associated with the Bhuj 2001 earthquake derived from recent and historic geodetic data 331
- Structures
 Isoseismals for the Kutch earthquake of 26th January 2001 375
- Subsidence
 Late Quaternary sea level and environmental changes from relic carbonate deposits of the western margin of India 1
- Summer monsoon
 The Indian summer monsoon as revealed by the NCMRWF system 95
- Systematic errors
 The Indian summer monsoon as revealed by the NCMRWF system 95
- TDS
 Dissolved helium and TDS in groundwater from Bhavnagar in Gujarat: Unrelated to seismic events between August 2000 and January 2001 51
- TOMS
 Study of total column atmospheric aerosol optical depth, ozone and precipitable water content over Bay of Bengal during BOBMEX-99 205
- TOPEX
 Thermohaline features of the subsurface cyclonic eddy in the south central Bay of Bengal during August 1999 233

- Tectonic stress
 Statistical parameters of Bhuj earthquake sequence of January 26th, 2001 397
- Temporal distribution
 Aftershock activity of Bhuj earthquake of January 26th, 2001 391
- Thermodynamic structure
 Thermodynamic structure of the marine atmosphere over the region 80–87° E along 13° N during August (phase II) BOBMEX-99 295
- Total column aerosol optical depth
 Study of total column atmospheric aerosol optical depth, ozone and precipitable water content over Bay of Bengal during BOBMEX-99 205
- Track
 Impact of horizontal resolution on prediction of tropical cyclones over Bay of Bengal using a regional weather prediction model 79
- Tropical convection
 Some salient features of the atmosphere observed over the north Bay of Bengal during BOBMEX 131
- Tropical cyclone
 Impact of horizontal resolution on prediction of tropical cyclones over Bay of Bengal using a regional weather prediction model 79
- Turbulent kinetic energy
 Simulation of marine boundary layer characteristics using a 1-D PBL model over the Bay of Bengal during BOBMEX-99 185
- Undrained poroelastic effect
 A simulation of earthquake induced undrained pore pressure changes with bearing on some soil liquefaction observations following the 2001 Bhuj earthquake 471
- Uplift
 Late Quaternary sea level and environmental changes from relic carbonate deposits of the western margin of India 1
- Urban buildings
 Isoseismals for the Kutch earthquake of 26th January 2001 375
- Waves and MLD
 Observations of wind and waves in the central Bay of Bengal during BOBMEX-99 and their effect on mixed layer depth variability due to forced mixing 255
- Western margin of India
 Late Quaternary sea level and environmental changes from relic carbonate deposits of the western margin of India 1
- Wind
 Observations of wind and waves in the central Bay of Bengal during BOBMEX-99 and their effect on mixed layer depth variability due to forced mixing 255
