

SUBJECT INDEX

- Abel transform
 - Abel transform on $\mathrm{PSL}(2, \mathbb{R})$ and some of its applications 255
- Absolute retract
 - Hartman–Mycielski functor of non-metrizable compacta 467
- Almost sure central limit theorem
 - Central limit theorem and almost sure central limit theorem for the product of some partial sums 289
- Associated primes
 - On the finiteness properties of Matlis duals of local cohomology modules 197
- AT -algebra
 - On ideals and quotients of AT -algebras 517
- Augmentation ideal
 - Some augmentation quotients of integral group rings 537
- Augmentation quotient
 - Some augmentation quotients of integral group rings 537
- Banach algebra
 - On n -weak amenability of Rees semigroup algebras 547
- Bounded derivation
 - On n -weak amenability of Rees semigroup algebras 547
- Branching processes
 - Growth of preferential attachment random graphs via continuous-time branching processes 473
- Brownian motion/diffusion
 - Large deviations: An introduction to 2007 Abel prize 161
- Burger's equation
 - Large deviations: An introduction to 2007 Abel prize 161
- Canonical commutation relation
 - Realizations of the canonical representation 115
- Carathéodory conditions
 - Solvability of boundary value problem at resonance for third-order functional differential equations 307
- Central automorphism
 - On automorphisms of some finite p -groups 1
- Central limit theorem
 - Central limit theorem and almost sure central limit theorem for the product of some partial sums 289
- Class preserving automorphism
 - On automorphisms of some finite p -groups 1
- Closed graph
 - Closed graph and open mapping theorems for normed cones 245
- Closed operator
 - Some properties of unbounded operators with closed range 613
- Coassociated primes
 - On the finiteness properties of Matlis duals of local cohomology modules 197
- Cofinite modules
 - On the finiteness properties of Matlis duals of local cohomology modules 197
- Continuous mapping
 - Closed graph and open mapping theorems for normed cones 245
- Convex conjugates
 - Large deviations: An introduction to 2007 Abel prize 161
- Cramer's theorem
 - Large deviations: An introduction to 2007 Abel prize 161
- Curves over higher local fields
 - Local duality for 2-dimensional local ring 525
- Davenport's constant
 - Some zero-sum constants with weights 183
- Decomposition theorem
 - Regularities of multifractal measures 273
- Densely defined operator
 - Some properties of unbounded operators with closed range 613
- Derivation
 - Push-outs of derivations 235

- Descending dimension method
 - An optimal version of an inequality involving the third symmetric means 505
- Digamma function
 - New inequalities for the Hurwitz zeta function 495
- Dirichlet problem
 - On existence and stability of solutions for higher order semilinear Dirichlet problems 627
- Discrete approximation
 - Approximation of quantum Lévy processes by quantum random walks 281
- Distance condition
 - Decomposition and removability properties of John domains 357
- Divisible module
 - On P -coherent endomorphism rings 557
- Donaldson polynomials
 - Parabolic bundles on algebraic surfaces I – The Donaldson–Uhlenbeck compactification 43
- Donsker–Varadhan theory
 - Large deviations: An introduction to 2007 Abel prize 161
- Double centralizer
 - Push-outs of derivations 235
- Dual space
 - On n -weak amenability of Rees semigroup algebras 547
- Dual variational method
 - On existence and stability of solutions for higher order semilinear Dirichlet problems 627
- Embedding
 - Growth of preferential attachment random graphs via continuous-time branching processes 473
- Empirical distribution
 - Large deviations: An introduction to 2007 Abel prize 161
- Entire function
 - Entire functions sharing one polynomial with their derivatives 13
- Ergodicity
 - Large deviations: An introduction to 2007 Abel prize 161
- Esscher transform/tilt
 - Large deviations: An introduction to 2007 Abel prize 161
- Euler characteristic
 - Euler characteristic and quadrilaterals of normal surfaces 227
- Evans–Hudson flow
 - Quantum random walks and their convergence to Evans–Hudson flows 443
- Existence of solutions
 - On existence and stability of solutions for higher order semilinear Dirichlet problems 627
- Exit problem
 - Large deviations: An introduction to 2007 Abel prize 161
- Extended quasi-pseudo-metric
 - Closed graph and open mapping theorems for normed cones 245
- Feynman–Kac formula
 - Large deviations: An introduction to 2007 Abel prize 161
- Filter regular sequences
 - On the finiteness properties of Matlis duals of local cohomology modules 197
- Finite p -group
 - On automorphisms of some finite p -groups 1
- Foliated Riemannian manifold of constant transversal Vranceanu curvature
 - Vranceanu connections and foliations with bundle-like metrics 99
- Foliation
 - Vranceanu connections and foliations with bundle-like metrics 99
- Foliation with bundle-like metric
 - Vranceanu connections and foliations with bundle-like metrics 99
- Frechet $*$ -algebra
 - Limit algebras of differential forms in non-commutative geometry 425
- F -trivial vector bundle
 - Some remarks on the local fundamental group scheme 207
- Functional boundary value problem
 - Solvability of boundary value problem at resonance for third-order functional differential equations 307
- Gaussian curvature
 - Holomorphic two-spheres in complex Grassmann manifold $G(2, 4)$ 381

- G*-bundle
 - The motive of the moduli stack of *G*-bundles over the universal curve 389
- Generating function
 - Sums of the squares of terms of sequence $\{u_n\}$ 27
- Geometric complexity
 - A geometric approach to the Kronecker problem I: The two row case 213
- GNS representation
 - Limit algebras of differential forms in non-commutative geometry 425
- Graded differential algebra
 - Limit algebras of differential forms in non-commutative geometry 425
- Hamilton–Jacobi equation
 - Large deviations: An introduction to 2007 Abel prize 161
- Harmonic map
 - Harmonic Riemannian maps on locally conformal Kaehler manifolds 573
- Hartman–Mycielski construction
 - Hartman–Mycielski functor of non-metrizable compacta 467
- Hasse principle
 - Local duality for 2-dimensional local ring 525
- Hausdorff measure
 - Regularities of multifractal measures 273
- H*-convergence
 - Low-cost control problems on perforated and non-perforated domains 133
- Heisenberg group
 - Realizations of the canonical representation 115
- Helgason–Fourier transform
 - Abel transform on $\mathrm{PSL}(2, \mathbb{R})$ and some of its applications 255
- Holomorphic map
 - Holomorphic two-spheres in complex Grassmann manifold $G(2, 4)$ 381
 - Harmonic Riemannian maps on locally conformal Kaehler manifolds 573
- Homogenization
 - Low-cost control problems on perforated and non-perforated domains 133
- Horosphere
 - Hypersurfaces in simply connected space forms 569
- Hurwitz zeta function
 - New inequalities for the Hurwitz zeta function 495
- Hyperbolic and quasihyperbolic metrics
 - Decomposition and removability properties of John domains 357
- Hypersurface
 - Hypersurfaces in simply connected space forms 569
- Ideal
 - On ideals and quotients of *AT*-algebras 517
- Inductive algebra
 - Realizations of the canonical representation 115
- Inequalities
 - New inequalities for the Hurwitz zeta function 495
- Inequality
 - An optimal version of an inequality involving the third symmetric means 505
- Infinite dimensional Lie algebras
 - On split Lie algebras with symmetric root systems 351
- Integral group ring
 - Zassenhaus conjecture for A_6 189
 - Some augmentation quotients of integral group rings 537
- Isoclinism
 - On automorphisms of some finite *p*-groups 1
- John disk
 - Decomposition and removability properties of John domains 357
- John domain
 - Decomposition and removability properties of John domains 357
- John domain decomposition property
 - Decomposition and removability properties of John domains 357
- Kaehler manifold
 - Harmonic Riemannian maps on locally conformal Kaehler manifolds 573
- K*-contact manifold
 - The structure of some classes of *K*-contact manifolds 371

- K*-cycle
 - Limit algebras of differential forms in non-commutative geometry 425
- Kronecker product
 - A geometric approach to the Kronecker problem I: The two row case 213
- L_p -dual mixed volume
 - The L_p -curvature images of convex bodies and L_p -projection bodies 413
- L_p -mixed volume
 - The L_p -curvature images of convex bodies and L_p -projection bodies 413
- L_p -projection body
 - The L_p -curvature images of convex bodies and L_p -projection bodies 413
- Laplace's method
 - Large deviations: An introduction to 2007 Abel prize 161
- Large deviation principle (LDP)
 - Large deviations: An introduction to 2007 Abel prize 161
- Left(right) *K*-completeness
 - Closed graph and open mapping theorems for normed cones 245
- Local cohomology modules
 - On the finiteness properties of Matlis duals of local cohomology modules 197
- Local duality
 - Local duality for 2-dimensional local ring 525
- Local fundamental group scheme
 - Some remarks on the local fundamental group scheme 207
- Locally conformal Kaehler manifold
 - Harmonic Riemannian maps on locally conformal Kaehler manifolds 573
- Markov processes
 - Large deviations: An introduction to 2007 Abel prize 161
- Matlis duality functor
 - On the finiteness properties of Matlis duals of local cohomology modules 197
- Matrix method
 - Sums of the squares of terms of sequence $\{u_n\}$ 27
- Moduli spaces
 - Parabolic bundles on algebraic surfaces I – The Donaldson–Uhlenbeck compactification 43
- Moduli stack
 - The motive of the moduli stack of G -bundles over the universal curve 389
- Moore–Penrose inverse
 - Some properties of unbounded operators with closed range 613
- Motive
 - The motive of the moduli stack of G -bundles over the universal curve 389
- Multifractal measures
 - Regularities of multifractal measures 273
- Nodal curve
 - Torsionfree sheaves over a nodal curve of arithmetic genus one 81
- Non-commutative differential forms
 - Limit algebras of differential forms in non-commutative geometry 425
- Normal functor
 - Hartman–Mycielski functor of non-metrizable compacta 467
- Normal surfaces
 - Euler characteristic and quadrilaterals of normal surfaces 227
- n -Weak amenability
 - On n -weak amenability of Rees semigroup algebras 547
- Occupation time
 - Large deviations: An introduction to 2007 Abel prize 161
- Open mapping
 - Closed graph and open mapping theorems for normed cones 245
- Optimal control
 - Low-cost control problems on perforated and non-perforated domains 133
- Optimal values
 - An optimal version of an inequality involving the third symmetric means 505
- Order of growth
 - Entire functions sharing one polynomial with their derivatives 13
- Packing measure
 - Regularities of multifractal measures 273
- p -Affine surface area
 - The L_p -curvature images of convex bodies and L_p -projection bodies 413

- Parabolic bundles
 - Parabolic bundles on algebraic surfaces I – The Donaldson–Uhlenbeck compactification 43
- P -coherent ring
 - On P -coherent endomorphism rings 557
- p -Curvature image
 - The L_p -curvature images of convex bodies and L_p -projection bodies 413
- Planar algebras
 - Planar algebra of the subgroup-subfactor 583
- p -Laplacian equations
 - Positive solutions for higher order singular p -Laplacian boundary value problems 295
- Positive solution
 - Positive solutions for higher order singular p -Laplacian boundary value problems 295
- PP ring
 - On P -coherent endomorphism rings 557
- Precover
 - On P -coherent endomorphism rings 557
- Preenvelope
 - On P -coherent endomorphism rings 557
- Preferential attachment
 - Growth of preferential attachment random graphs via continuous-time branching processes 473
- Principal eigenvalue
 - Large deviations: An introduction to 2007 Abel prize 161
- Products of sums
 - Central limit theorem and almost sure central limit theorem for the product of some partial sums 289
- Projective curvature tensor
 - The structure of some classes of K -contact manifolds 371
- Pseudocokernel
 - On P -coherent endomorphism rings 557
- Pseudokernel
 - On P -coherent endomorphism rings 557
- Purity
 - Local duality for 2-dimensional local ring 525
- Quantized integrals
 - Limit algebras of differential forms in non-commutative geometry 425
- Quantum dynamical semigroup
 - Quantum random walks and their convergence to Evans–Hudson flows 443
- Quantum Lévy process
 - Approximation of quantum Lévy processes by quantum random walks 281
- Quantum random walk
 - Approximation of quantum Lévy processes by quantum random walks 281
- Quantum random walk
 - Quantum random walks and their convergence to Evans–Hudson flows 443
- Quasi-normed cone
 - Closed graph and open mapping theorems for normed cones 245
- Quotient
 - On ideals and quotients of AT -algebras 517
- Radon transform
 - Abel transform on $PSL(2, \mathbb{R})$ and some of its applications 255
- Random graph
 - Growth of preferential attachment random graphs via continuous-time branching processes 473
- Rank of negativity
 - Sharp bounds on the ranks of negativity of certain sums 321
- Rate function
 - Large deviations: An introduction to 2007 Abel prize 161
- Reduced minimum modulus
 - Some properties of unbounded operators with closed range 613
- Regular K -contact manifold
 - The structure of some classes of K -contact manifolds 371
- Regularity
 - Regularities of multifractal measures 273
- Removability property
 - Decomposition and removability properties of John domains 357
- Resonance
 - Solvability of boundary value problem at resonance for third-order functional differential equations 307
- Ricci curvature
 - Hypersurfaces in simply connected space forms 569

- Riemann zeta function
 - New inequalities for the Hurwitz zeta function 495
- Riemannian map
 - Harmonic Riemannian maps on locally conformal Kaehler manifolds 573
- Roots
 - On split Lie algebras with symmetric root systems 351
- Sample path LDP
 - Large deviations: An introduction to 2007 Abel prize 161
- Sanov's theorem
 - Large deviations: An introduction to 2007 Abel prize 161
- Sasakian manifold
 - The structure of some classes of K -contact manifolds 371
 - Harmonic Riemannian maps on locally conformal Kaehler manifolds 573
- Scale-free
 - Growth of preferential attachment random graphs via continuous-time branching processes 473
- Second order recurrence
 - Sums of the squares of terms of sequence $\{u_n\}$ 27
- Semigroup
 - On n -weak amenability of Rees semigroup algebras 547
- Shared value
 - Entire functions sharing one polynomial with their derivatives 13
- Sharp bounds
 - Sharp bounds on the ranks of negativity of certain sums 321
- Singular BVPs
 - Positive solutions for higher order singular p -Laplacian boundary value problems 295
- Space forms
 - Hypersurfaces in simply connected space forms 569
- Split Lie algebras
 - On split Lie algebras with symmetric root systems 351
- Stability
 - Torsionfree sheaves over a nodal curve of arithmetic genus one 81
- On existence and stability of solutions for higher order semilinear Dirichlet problems 627
- Standard invariant
 - Planar algebra of the subgroup-subfactor 583
- Subfactors
 - Planar algebra of the subgroup-subfactor 583
- Sufficient and necessary conditions
 - Positive solutions for higher order singular p -Laplacian boundary value problems 295
- Sums
 - Sharp bounds on the ranks of negativity of certain sums 321
- Sums of squares
 - Sums of the squares of terms of sequence $\{u_n\}$ 27
- Symmetric group representations
 - A geometric approach to the Kronecker problem I: The two row case 213
- Third symmetric mean of k degree
 - An optimal version of an inequality involving the third symmetric means 505
- Topological degree
 - Solvability of boundary value problem at resonance for third-order functional differential equations 307
- Torsion unit
 - Zassenhaus conjecture for A_6 189
- Torsionfree module
 - On P -coherent endomorphism rings 557
- Torsionfree sheaves
 - Torsionfree sheaves over a nodal curve of arithmetic genus one 81
- Totally geodesic
 - Holomorphic two-spheres in complex Grassmann manifold $G(2, 4)$ 381
- Totally umbilic
 - Hypersurfaces in simply connected space forms 569
- Transversal Einstein foliated Riemannian manifold
 - Vrăncăanu connections and foliations with bundle-like metrics 99
- Tykhonov cube
 - Hartman–Mycielski functor of non-metrizable compacta 467
