AIMS AND SCOPE

Journal of Chemical Engineering of Japan, an official publication of the Society of Chemical Engineers, Japan is dedicated to providing timely original research results in the broad field of chemical engineering ranging from fundamental principles to practical applications. Subject areas of this journal are listed below. Research works presented in the Journal are considered to have significant and lasting value in chemical engineering.

- Phyical Properties and Physical Chemistry
- Transport Phenomena and Fluid Engineering
- Particle Engineering
- Separation Engineering
- Thermal Engineering
- Chemical Reaction Engineering
- Procrss Systems Engineering and Safety
- Biochemical Food and Medical Engineering
- Micro and Nano Systems
- Materials Engineering and Interfacial Phenomena
- Energy
- Environment
- Engineering Education
