AIMS AND SCOPE

Journal of Chemical Engineering of Japan, an official publication of the Society of Chemical Engineers, Japan is dedicated to providing timely original research results in the broad field of chemical engineering ranging from fundamental principles to practical applications. Subject areas of this journal are listed below. Research works presented in the Journal are considered to have significant and lasting value in chemical engineering.

Physical Properties and Physical Chemistry	Biochemical Food and Medical Engineering
Transport Phenomena and Fluid Engineering	Micro and Nano Systems
Particle Engineering	Materials Engineering and Interfacial Phenomena
Separation Engineering	Energy
Thermal Engineering	Environment
Chemical Reaction Engineering	Engineering Education
Process Systems Engineering and Safety	

The Instructions for Contributors and other information are available through our website (<http://www.scej.org/jcej/>).
