PREFACE

On behalf of the organizing committee and technical program committee, we would like to extend to you a warm welcome to 2018 3rd International Conference on Reliability Engineering (ICRE 2018) in Barcelona, Spain.

The aim objective of ICRE 2018 is to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Reliability Engineering. This conference provides opportunities for the delegates to exchange new ideas and application experiences face to face, to establish business or research relations and to find global partners for future collaboration.

This year, we received 43 submissions and 21 papers are accepted for publication in conference proceedings. We continue to build on the theme of reliability engineering, with keynotes and papers on this important and growing topic. Every year at ICRE we strive to organize a conference that is technical strong while offering a great attendee experience. We look forward to your survey feedback in continuing to keep this conference a great experience in future years. Welcome to ICRE and I hope you will enjoy both the conference and the sunshine in Barcelona.

Prof. Michael Pecht
University of Maryland, USA

Conference Chair of ICRE2018
