## Preface

From November 2nd till 4th, 2018, the 2018 International Conference on Civil, Architecture and Disaster Prevention (ICCADP 2018) was successfully held in Hefei, China. It was hosted by the School of Civil Engineering of Anhui Jianzhu University and co-organized by Guangdong Academy of International Academic Exchange.

The aim of the conference was to promote research and studies in the field of construction engineering and disaster prevention and encourage scientific information interchange and communication among researchers.

ICCADP 2018 provided all the participants with an excellent opportunity to present their research results to major areas of civil engineering, architecture, building materials and engineering management and disaster prevention, etc. And it intimidated discussions on the topics that of interest to the Conference participants. More than 150 papers were selected to go through a strict double blinded peer reviewed process. In turn, these selected papers were published by IOP Conference Series: Earth and Environmental Science (EES).

The organization of this conference and the preparation of proceedings volume would have been impossible without the tremendous efforts and dedication of many individuals. We would like to express our gratitude to all the participants, presenters, contributors and reviewers as they gave us full support. We sincerely hope that the conference will serve as an ideal forum for academia, industrial practitioners and government agents.

Prof.Deyi Wu

Chairman of ICCADP 2018 conference
