## PREFACE

ITB International Geothermal Workshop (IIGW) is an annual event organized by *Prodi Teknik Panas Bumi, Fakultas Teknik Pertambangan dan Perminyakan (FTTM)*, ITB. The workshop celebrated its 7th anniversary this year. It was held on March 19–23, 2018 and has become a special moment in supporting the geothermal development acceleration program in Indonesia.

The objective of the workshop was to create a knowledge sharing forum among the key stakeholders in energy and extractive resource sectors on the status of geothermal development in Indonesia. It focused on the latest condition after the approval of new regulation of geothermal energy law No 2014. The conference featured distinguished speakers, scientists, engineers, financiers, and other key players in geothermal and energy sectors worldwide.

Participants benefit the exchanges of view, knowledges and experiences on latest technologies and researches by bringing together scientists, engineers, academicians, experts, and industrial stakeholders involved in geothermal studies and developments.

As part of this year commitment, selected papers are published as open access volume of *IOP Conference Series: Earth and Environmental Science*. Other papers are published in the conference proceeding in print version. We hope wider geothermal communities will gain the same benefits as our conference attendees.

IIGW 2018 IOP Publication is funded by LPPM (Institute for Research and Community Services) ITB
