

Preface

The 2017 2nd International Conference on Materials Science, Energy Technology and Environmental Engineering (MSETEE 2017) has been held on April 28-30, 2017 in Zhuhai City, China. The conference addressed recent development in the following,

- (1) Chemical and Materials Science
- (2) Resources and Environment
- (3) Architecture and Environment
- (4) Energy and Power
- (5) Electronic Information Technology

In order to organize MSETEE 2017, we have sent our invitation to scholars and researchers from all around the world. Eventually, over 400 submissions were submitted to us. These papers have gone through a strict reviewing process performed by our international reviewers and 213 papers have been accepted. All the submissions were double-blind reviewed, both the reviewers and the authors remaining anonymous. First, all the submissions were divided into several chapters according to the topics, and the information of the authors, including name, affiliation, email and so on, removed. Then the TPC chairs assigned the submissions to reviewers according to their research interests. Each submission was reviewed by two reviewers. The review results should be sent to chairs on time. If two reviewers had conflicting opinions, the paper would be transmitted to the third reviewer assigned by the chairs. Only papers which were approved by all reviewers were accepted for publication.

We sincerely express our thanks to all the members of 2017 2nd International Conference on Materials Science, Energy Technology and Environmental Engineering (MSETEE 2017). Thanks are also given to IOP publisher for producing this volume.
