Received 23 February 2004; accepted for publication 12 March 2004

---

**Keywords:** Alloys; Angle resolved photoemission; Iron; Magnetic films; Magnetic phenomena (cyclotron resonance, phase transitions, etc.); Magnetic surfaces; Nickel; Photoelectron spectroscopy; Semi-empirical models and model calculations; Soft X-ray photoelectron spectroscopy

---

In a pair of earlier publications [1,2], a significant error was made in the description of the Fe 3p states. The manifestation of this error can be seen in Fig. 1 of Ref. [1] and Fig. 1 of Ref. [2], where States 3, 4 and 6 cross. These crossings should not occur. The correction of this error and of some related small errors, is described in Ref. [3].

We would like to thank van der Laan [4] and Henk et al. [5] for bringing this to our attention.

This work was performed under the auspices of the U.S. Department of Energy by University of California, Lawrence Livermore National Laboratory under Contract W-7405-Eng-48.
